

SUMMER CAMPS

LEGO® robotics, the Wizbots way...

Wizbots allows for lots of creative freedom!

BUILD

Start with LEGO® robotics. Throw in advanced robotic sensors, unique building materials, and crafts. Infuse with lots of **imagination**. The engineering possibilities are endless, and you're solving problems, not assembling kits.

CODE

Code your robots in **Java**, one of the world's most popular and powerful programming languages. Not only can your robots do more advanced things, you're learning a highly transferable skill.

PLAY

It's all about fun. Play a team game, compete in a tech challenge, or design a crazy elephant tickler, all while making new friends. Then, play your project **videos online** and share them with family and friends.

- For girls and boys, ages 7-14
- Full day, half day & extended care options
- Experienced, year-round instructors
- Convenient locations across the Bay Area
- Great value pricing all the time
- Week to week, campers tackle new challenges

"My daughter can't stop talking about Wizbots. Thank you for making STEM as fun and exciting as I know it can be. You really are inspiring her." - Joyce
