

# Tech Time!

October 5-October 9, 2015

Welcome to the third edition of Tech Time featuring technology wonders created by student volunteers! October brings us a new area for our volunteers to explore, the amazing 3D printer! To create their 3D items, the student engineers will be involved in a 3 step process:

1. The creation of a prototype with modeling clay.
2. The design of the object using the website [Tinkercad](http://tinkercad.com).
3. The printing process using one of five colors: white, blue, red, green or yellow.

Kindly check back in 2 weeks time, the October 19-23 edition, to see photos of the finished products!

Until next time, happy computing!

Teacher Scott
