

Tech Time!

February 1 - February 5, 2016

Dear Readers,

Welcome back to another edition of Tech Time featuring technology wonders created by tech-savvy students! The wonderful month of February is now upon us, and for our student volunteers it gives them the opportunity to be digital photographers extraordinaire! All during the month, our photographers will be photographing items around school, both indoor and out while using special digital cameras to take their photos. These photos will then be downloaded to student computers for editing and finally posting on the computer lab's website!

Our next edition of Tech Time will be during the week of February 15th and at this time, our Digital Photography exhibit will be ready for your visit. So get ready for a splendid assortment of photos and until then, take care and happy computing!

In friendship,

Teacher Scott
