**Product Series:** 8300/8500 and 5100/5150  
**Topic:** Update for 18' Door Embossment Spacing

---

**To:** All Wayne Dalton Dealers  
**From:** Mark Sawicki  
**RE:** Update in 8300/5100 & 8500/5150 18' Door Embossment Spacing

Effective November 16, we will be producing the Models 8300/5100 & 8500/5150 Ranch 18' wide door with visually improved spacing. The end spacing will decrease from 18.3" to 10.875" and the spacing between embossments will increase from 4.75" to 9.75" for a resulting look that distributes the embossments more evenly along the opening. Additionally, this change will better accommodate wider decorative hardware placed in between the embossments, similar to the spacing for the Sonoma Ranch. Widths other than 18' will be unaffected by this change.

Replacement sections for the old spacing will continue to be available for up to 2 years. As with previous discontinuations, Wayne Dalton reserves the right to replace a product with equal or greater value, particularly in later time from the changeover as replacement parts no longer make practical and/or financial sense to manufacture or purchase. For example, rather than shipping just one section with the old embossment spacing, we would just replace all the sections on the door at no additional cost.
