Advocacy	Sustainability Uniqueness	Historic Streetscape	<p>Street Tree Canopy Disappearance - Life Cycle Cost Study The historic street tree canopy in Durham's older neighborhoods is under assault from Duke Power trimmings and age of species. The City of Durham a) does not have money to replace all trees being lost and b) is replacing oak trees with smaller species that won't rise to the height of power lines, but which also won't provide the same canopy shading as existing.</p> <p>Identify scope and funding for a study to investigate costs and environmental factors associated with loss of canopy, replacing tree canopy, and undergrounding power lines.</p> <p>Granite Curbs - Life Cycle Cost Study The removal of granite street curbs for street repaving continues to be a concern for local residents, and we (and the City Council) field many phone calls when these projects arise. Public Works sole model is to remove these curbs and replace them with new concrete, which is:</p> <ul style="list-style-type: none"> • Not as aesthetically pleasing • Does not have the life span and re-use capability of granite <p>Life Cycle cost analysis and sustainability evaluation is needed to have ammunition with which to change City policy.</p>	Character Sustainability
