

Luxury Redefined.

Introducing the all-new 2016 Berkshire XLT

The newest addition to Forest River's Berkshire family of luxury diesel motorcoaches, the Berkshire XLT delivers unsurpassed quality and unparalleled performance at a price point all its own. With an MSRP of \$325,000, there is, quite simply, nothing else available at the Berkshire XLT's level that offers the same outstanding features!

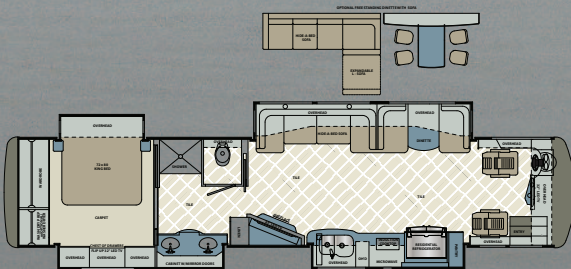

Built on a Freightliner XCR raised-rail chassis and powered by a side-radiator Cummins ISL9 450-hp diesel, the Berkshire XLT combines Freightliner's V-Ride suspension and UltraSteer precision-tuned tag axle for extraordinary handling and precise maneuvering. It also combines a 2-stage Jacobs braking system with adjustable pedals for increased driver comfort and confidence.

Initially available in one 43-foot, four-slideout

floorplan, the 43A Berkshire XLT is exceptionally well-appointed. Standard features include ceramic tile floors, side-by-side residential-style refrigerator, Corian countertops, Quiet AC system and an electric induction cooktop. Add to that a 150-gallon fuel tank to get your customers where they want to go, 15,000-pound towing capacity to take their toys with them and an 8kW Onan ac generator to maintain their lifestyle when they get there.

Berkshire XLT. It has the ride your customers need, the distinct look they want and the comfort and amenities they demand.

See the new 2016 Berkshire XLT at the Forest River product expo, Sept. 22-24 at the Dynamax facility at the corner of County Road 6 and Northland Drive!
