

Alternative Animal Bedding Open House, June 26

10 am – 2 pm

Competition for wood products for biomass plants in NS has increased the cost and reduced the availability of sawdust, wood shavings, etc for animal bedding.

Farmers have been using the bedding for over 2 years. What have they been saying?

Excellent absorbency, keeps stalls and animals dry, excellent grip in alleys, cows like to lay on it, keeps calves warm in winter, stays in slurry, economical, a load lasts much longer than typical bedding. Bedding can be used for all livestock.

Halifax C&D Recycling and LP Consulting invite you to an open house at the new bedding facility in Hardwoodlands.

See how the bedding is made and find out why farmers are booking bedding for their farms months in advance!

Milford Exit 9 from Hwy 102, take road across from Shaw Resources (Hubley Rd). Follow the signs to **130 Lohnes Road!** Call for directions at the number below or give Misty a call at 790-6405 on June 26 if you need help finding us! We'll see you at the plant!
