Des Moines Area Automotive Service Professionals

Lab Scopes Live By Kevin Leiby

Saturday, January 23, 2016

8:00 am—5:00 pm

LOCATION:

Westside Auto Pros

1901 NW 92nd Court
Clive, IA 50325

ASA members - \$179

Non-Members - \$269

Includes continental breakfast,
lunch & training

Only 20 Spots—RSVP by January 15th

We will cover how to select the proper voltage and time bases for the circuit or components being tested. Proper set up when testing AC & DC signals. Understand trigger level, scope—positive or negative, trigger types and when, how and why we may want to utilize a trigger. Understand Series, Parallel & Series-Parallel circuits, what and how to calculate circuit resistances, thus know before testing what our circuit current flow will be and where is the proper place to test as determined by circuit configuration. We will cover amperage testing as well as utilizing high and low amp clamps to capture the voltage and amperage.

This is HANDS ON class and attendees are encouraged to bring their labscopes and transducers to learn on. This is not a classroom experience but working on actual vehicles for hands-on learning. Only 20 seats available—secure your spot today!

Registration Form

Company: _____ Phone: _____

Attendees: _____

Credit Card : _____

Name on the Card: _____

Exp. Date: _____ CVC Code: _____

Billing Address: _____ Zip: _____

Fax to 816.817.2260
