ASA Springfield Scholarship Fund*

Includes dinner & training

RSVP BY JULY 31st

Modern brake systems operate on the same principles that braking systems have used for over 100 years. Recent regulation changes combined with the pursuit of improved fuel economy and safety have resulted in changes in the designs. Some changes have increased the occurrences of the braking system noises. This three-hour seminar presents information and diagnosing brake system noise concerns, service tips and procedures to reduce brake noise comebacks. In addition, special service tools and ACDelco brake products are discussed.

You will receive a GM Parts Powertrain Training Certificate on Brake Service Tips suitable for framing.

CHAPTER OFFICER ELECTIONS WILL BE HELD AT THIS EVENT
