BrettYoung Announces Significant Investments in Expanding Capacity

Winnipeg, MB – BrettYoung is pleased to announce that its Board of Directors has approved the largest single investment in company history. The investment plan will significantly expand seed storage, cleaning, blending and bagging capacity at its Winnipeg facility and improve blending and bagging throughput at the company's Calmar, Alberta location.

"To best serve the growing and evolving needs of our customers we need to ensure we are resourced to do so" said Cory Baseraba, Chief Operating Officer at BrettYoung. "These investments coupled with the recent opening of our state-of-the-art seed coating and treating facility will position us to deliver the seed products and services our customers are requesting. Importantly the expansion also enhances our ability to serve our seed grower partners by allowing us to more efficiently receive the high quality seed they produce. The expansion demonstrates our continued commitment to our long standing seed grower partnerships."

"The Board enthusiastically supported this plan which is a direct reflection of our ongoing commitment to provide innovative seed solutions and industry leading service" said Lloyd Dyck, Chairman of BrettYoung. "These investments position us to serve the go-forward needs of our farmer partners and customers."

Design work, construction planning and permitting are underway and the new capacity is anticipated to come on-line in several phases over the next 12 months.
