

# Pile Drive Hammer Pads

Thyssenkrupp Materials NA, AIN Plastics Division has access to the largest inventory of hammer pad materials including T-6 aluminum and canvas phenolic\* for Hammer Cushions as well as Cast Nylon 904P.

Cast Nylon 904P is a specially formulated heat stabilized nylon made exclusively for the pile driving industry. Plasticizers have been added during the manufacturing process to extend the life of the cushion under high load and operating temperatures. Unlike aluminum and canvas phenolic, the nylon pads are typically used on their own.

Cast Nylon 904P | Aluminum | Canvas Phenolic\*

In addition to our inventory of standard sizes, AIN Plastics can quickly cut and ship custom sizes. We can also provide customized inventory solutions to ensure your material is on hand and ready for you.

Standard Hammer Pad Sizes		
Cast Nylon 904P	Canvas Phenolic	Aluminum
Thickness   Diameter	Thickness   Diameter	Thickness   Diameter
2 x 22.5	1 x 22.5	.5 x 22.5
2 x 25	1 x 25	.5 x 25
	1 x 30	.5 x 30
Custom sizes available fast! Call us with the size you need 877.246.7700		

## Pile Wrap

AIN Plastics stocks High Density (HDPE) durable plastic material. This easy to apply material allows for the continued use of treated wood piles by protecting them from exposure to the environment.

### Benefits of HDPE Pile Wrap Material:

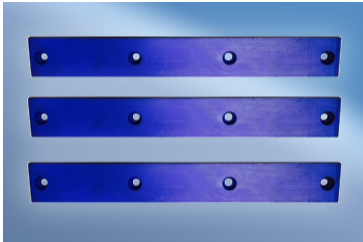

- Withstands harsh marine conditions
- Protects wood from marine borers, fungus, insects and salt
- Non-Toxic
- Easy to apply
- Long-lasting
- Seals to prevent the release of chemicals in the wood
- Excellent UV Rating

## Wear Pads

We can make and ship wear pads to you fast!

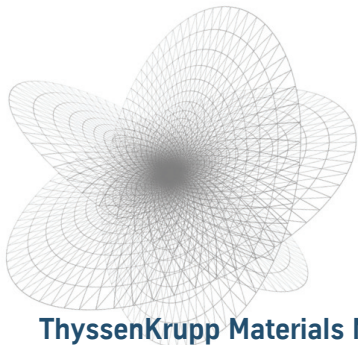

AIN Plastics has the material stock and the capabilities to make wear pads to your specifications in-house, providing you with fast manufacturing and delivery to your location.

Just let us know your dimensions and the material you require and we will provide you with pricing and turn around. Ask about our custom stocking solutions to keep your product on the shelves and ready to ship.

Custom wear pads from Cast Nylon 904P

\* Canvas phenolic is also known under the trade names Micarta or Conbest®

## ThyssenKrupp Materials NA AIN Plastics Division

is a leading full line distributor with over 40 years of expertise as a fabricator of industrial plastic shapes and high pressure laminates, specializing in engineering plastics for the fabricator and OEM communities. The company operates over twelve warehouse locations and 13 sales offices in the United States, structured around local distribution service centers providing fast, efficient delivery to their customers. Their value-added processing system is customer-based, designed to give salespeople the tools they need to quickly and accurately process orders. The company's nationwide logistics system allows next-day delivery to the majority of customers in North America.

### AIN Plastics Division Locations

- Riverview, Florida
- Yonkers, New York
- Kennesaw, Georgia
- Columbus, Ohio
- Bensenville, Illinois
- Lancaster, Pennsylvania
- Canton, Massachusetts
- Grand Prairie, Texas
- Madison Heights, Michigan
- Virginia Beach, Virginia
- Earth City, Missouri
