

Join Us for a Special Program for Museum Members only at Central Connecticut State University's Copernican Observatory and Planetarium on Friday, Dec. 4th (Snow Date of Dec. 11th).

"The Planets of the Sun" will be the theme of the show. Explore the eight planets of our solar system and their major moons. Learn about their surface features, their atmospheres, how much one would weigh on each planet, how long their days and years are, if they are hot or cold, why flipping real estate on Venus may have a literal meaning, the Martian canals and why the solar powered rovers on Mars can last so long. Gain a better understanding about Ceres and Pluto which are two of our solar system's dwarf planets that were both visited by spacecraft in 2015. The program will also identify the major constellations, bright stars, and what planets are visible on the night of December 4th (or the 11th if we have to use our snow date.)

The program will start at 6:30 p.m.; please arrive at 6:15 p.m. The program will last no more than 1.5 hours with extra time after for looking at the Planetarium sky. If the real sky is clear, we will look through the rooftop telescopes. We encourage those ages 5 and up to attend this program. You are permitted to bring anyone who is included in your Museum membership. We will charge a fee of **\$5** per person to reserve your seat(s) in the Planetarium. We will send you confirmation and directions upon receipt of your payment.

Return this form and payment to: New England Air Museum, 36 Perimeter Rd., Windsor Locks, CT 06096. Any questions please call 860-623-3305x311 or email gina-maria@neam.org
