

YOUR CUSTOMERS DEPEND ON YOU.

Downtime can be detrimental to your businesses' reputation, brand, and bottom line. Take responsibility and enable your business to continue to operate through whatever storm it is forced to weather with Bluetowne's Disaster Recovery-as-a-Service (DRaaS). We will work with you to develop a comprehensive plan to ensure that your organization can continue to deliver your products or services at acceptable predefined levels following a disruptive incident, and ensure optimized, speedy recovery and restoration of your data and applications. Be prepared - your customers depend on you.

BE PREPARED:

IT DISASTER PREPAREDNESS

Businesses with a plan know exactly what to do when a disaster strikes. But all too often, companies overrate their level of readiness. When a disruption hits – chaos and confusion ensue, rather than quick response and recovery. The fundamentals of a solid IT disaster preparedness plan are simple, and the areas where your business should take concern include:

- » Backups
- » Continuous Data Protection
- » Offsite Replication
- » Server Imaging
- » Extend to Cloud

BUSINESS CONTINUITY INFRASTRUCTURE

Ensuring that your most critical people and processes remain operational in the wake of a disaster due to a well-crafted disaster recovery plan is crucial, and expected by today's ever-demanding customer. Too many businesses fail because they were ill prepared, even when a simple solution like online backup could have saved them. Be prepared with systems and services that perpetuate business continuity, including:

- » Warm/Hot Failover Site
- » Hybrid Cloud
- » Layer 2/3 Networking
- » Virtualization Recovery Platform
- » Browser-Based Continuity

DISASTER AND CONTINUITY CONSULTING

Putting all the pieces together takes expertise, planning and design. Bluetowne's professional services team provides strategic consulting for your disaster recovery and business continuity efforts to fit the unique needs and budget of your organization. Allow us to be your strategic partner prior-to, during and following a critical IT disaster. Downtime will happen. Preparedness is the first step to ensuring your data is protected, your operations can continue, and your reputation will not be damaged. Minimize the impact on your business, and protect the market share you've worked so hard to gain.

DISASTER RECOVERY & BUSINESS CONTINUITY
