

Metropolitan Council Environmental Services (MCES) Sewer Repair Project Notice – October 16, 2012

Southwest Minneapolis Interceptor Rehabilitation Project Information

Metropolitan Council Environmental Services (MCES), operator of the metro-area wastewater collection and treatment system, plans to begin the **Southwest Minneapolis Interceptor Rehabilitation Project** in summer 2013. The project will include repairs to or replacement of regional sanitary sewers in the Linden Hills Neighborhood that have deteriorated over the years. Because work on these regional sewers will not begin until next year, the City of Minneapolis has delayed its mill and overlay paving of streets in the sewer project areas.

Three regional sewers are planned for rehabilitation in summer 2013. Liners will be installed in the sewers using trenchless technology, and the maintenance holes will be repaired, lined or internally coated. Some of the maintenance holes will be removed. The sewer rehabilitation work will require diversion of wastewater through temporary pipes that generally will be above ground, but they will be buried at driveway entrances and roadway crossings. Except as allowed by the Minneapolis Traffic Department, these temporary sewer pipes will not block any roadways. Small excavations will be needed at all maintenance holes and at several additional locations for the temporary sewer pipes.

In the Linden Hills Neighborhood targeted for mill and overlay paving, the regional sewer rehabilitation project areas are located as follows:

- **MCES sewer 1-MN-341:** on Drew Ave. S. between 39th St. W. and 38th St. W.; on 38th St. W. from Drew Ave. S. to Upton Ave. S.; and on Upton Ave. S. from 38th St. W. to Calhoun Pkwy.
- **MCES sewer 1-MN-343:** Sunnyside Ave. and 44th St. W. from France Ave. to Drew Ave. S., and Drew Ave. S. from 44th St. W. to Chowen Ave. S.
- **MCES sewer 1-MN-343A:** France Ave. from 44th St. W. to Glendale Terrace, and Glendale Terrace from France Ave. to Drew Ave. S.

One other MCES regional sewer in the Linden Hills Neighborhood, **1-MN-342**, is very badly deteriorated and sagged and will require total reconstruction. This regional sewer replacement project area is located as follows:

- France Ave. from 42nd St. W. to 41st St. W., 41st St. W. from France Ave. to Ewing Ave. S., Ewing Ave. S. from 41st St. W. to 39th St. W., and 39th St. W. from France Ave. to Drew Ave. S.

The work will involve excavation and removal of the old sewer pipe and maintenance holes, installation of new support piling, and installation of new sewer pipes and maintenance holes. The work is tentatively planned to start in fall of 2013 and be completed by approximately late 2014. Roads will be repaved as part of the project.

(OVER)

MCES SEWER REPAIR PROJECT NOTICE – OCTOBER 16, 2012

The cost of these regional sewer repairs will not be assessed to adjacent property owners. The cost is spread out among all of MCES's sewer customers in the metro area.

Three maps are included to show the sewer rehabilitation project locations. Additional information about the Southwest Minneapolis Interceptor Rehabilitation Project will be posted and updated periodically on the Metropolitan Council's website:

www.metrocouncil.org/sewerconstructionupdates

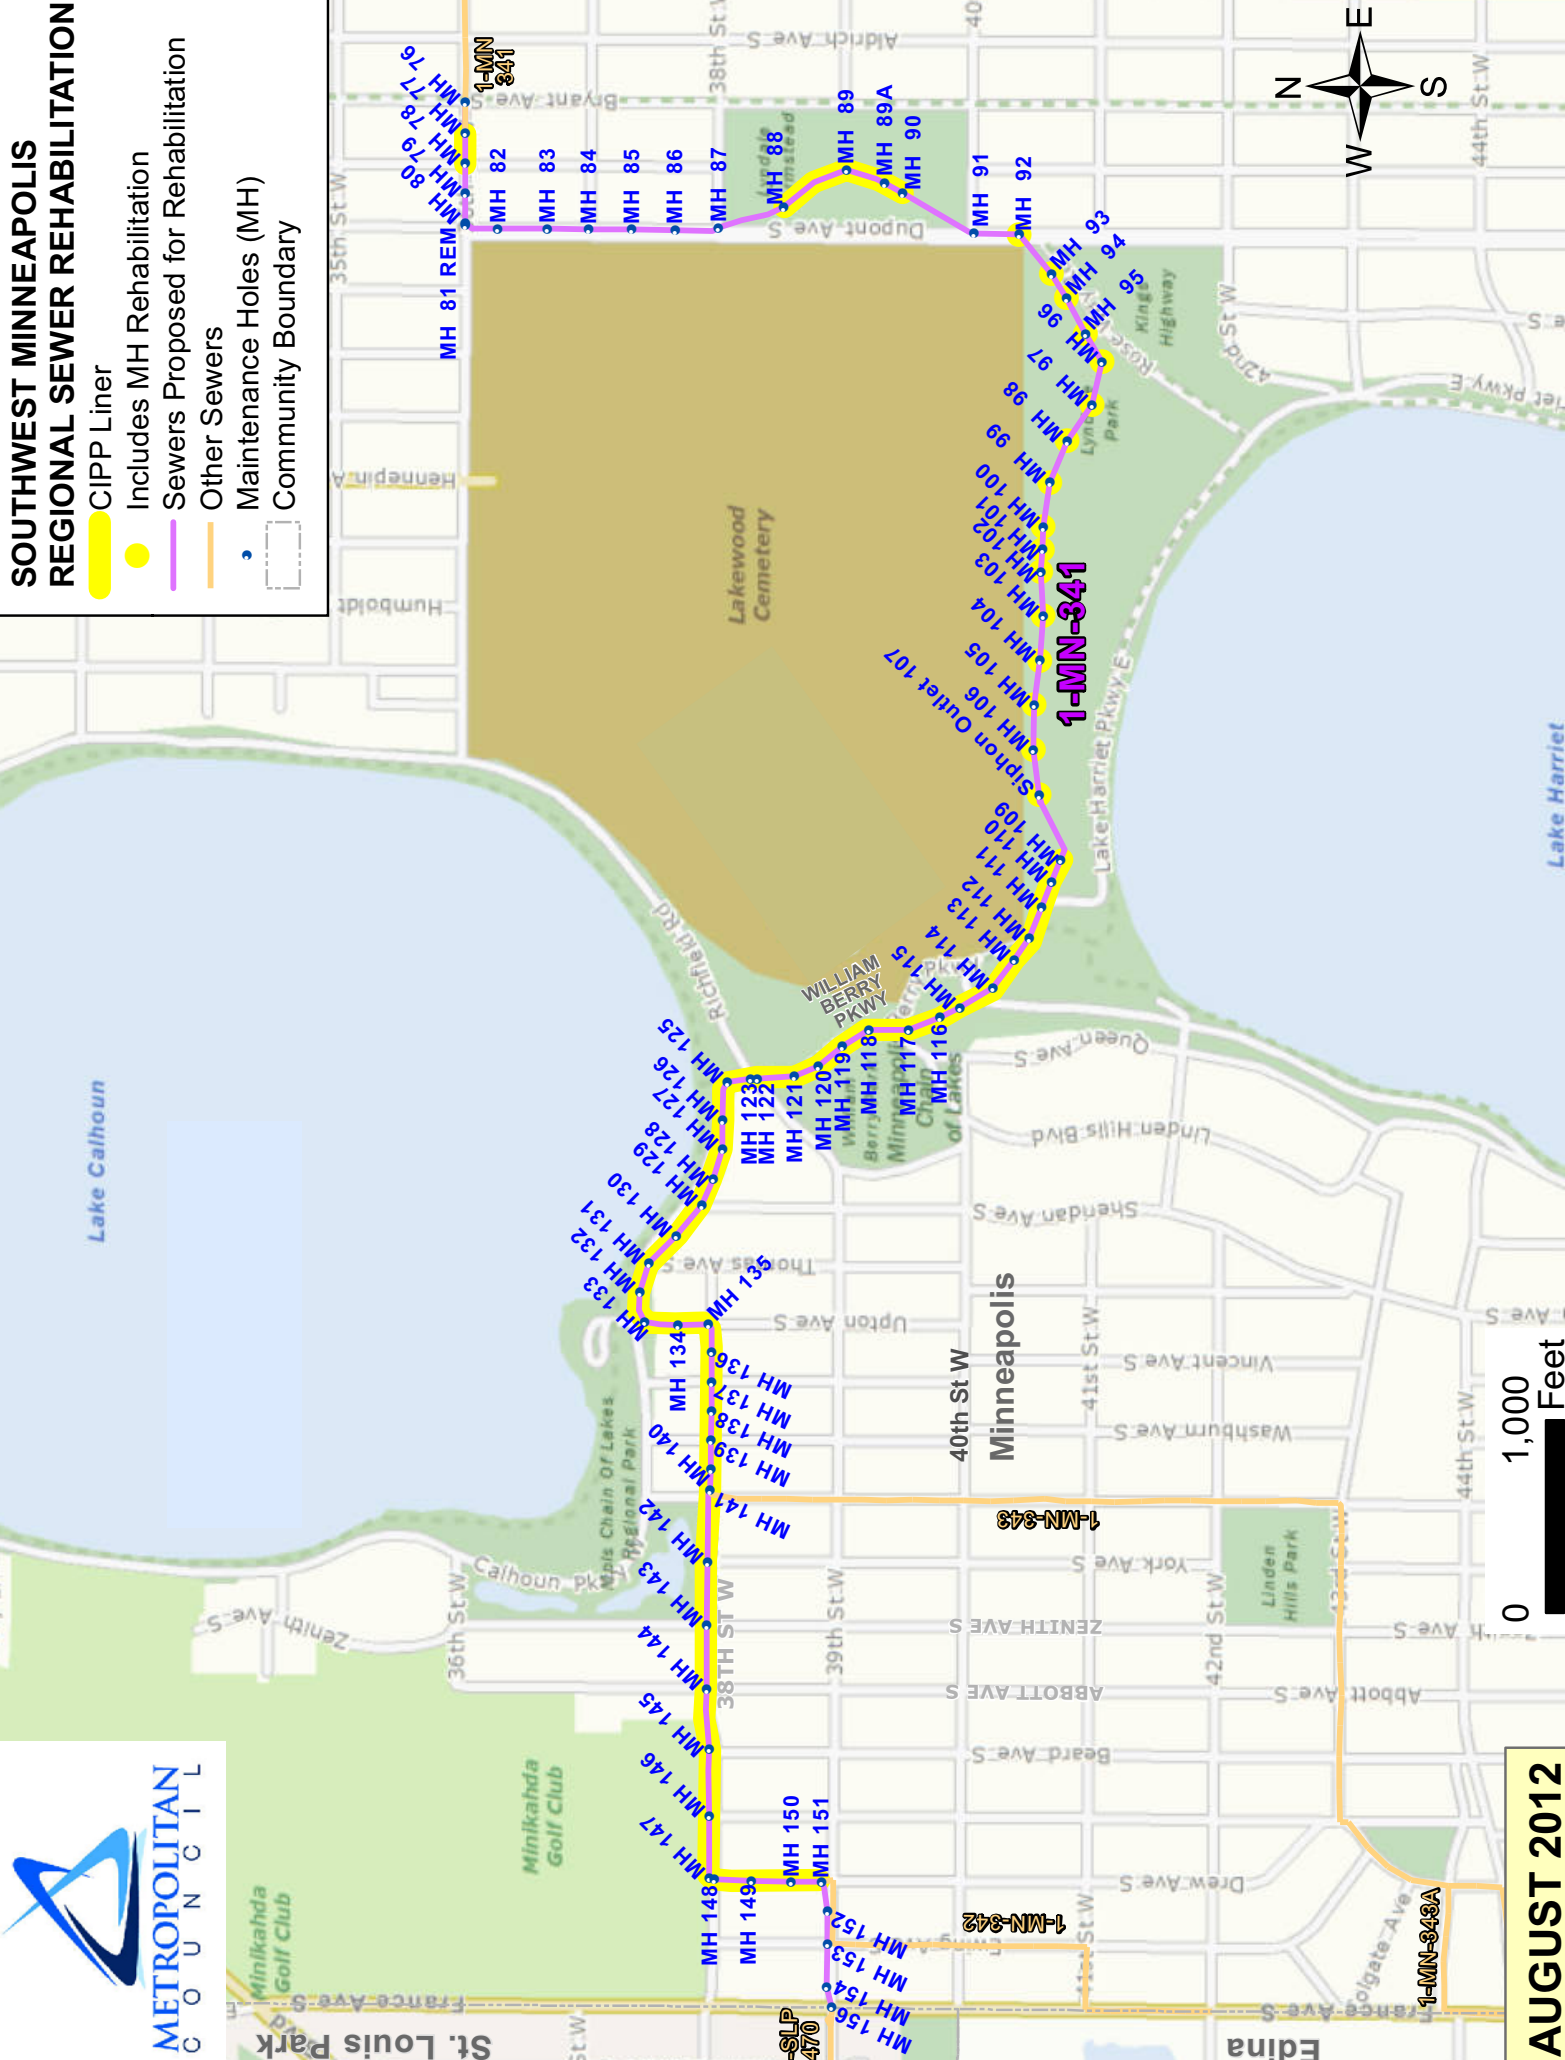

MCES staff are available to review this project with you and answer your questions in person or by phone or e-mail. Please feel free to contact:
