160 /

**Do You Know Your Family Planning Choices?**

Small text and graphics describing various family planning methods.

**Family Planning via Methods in 2008**

Method	Prevalence (%)	Change (%)
Condom	1.2	0.1
Injectable	1.8	0.2
Diaphragm	0.5	0.0
Coitus Interruptus	0.3	0.0
Female Sterilization	0.1	0.0
Male Sterilization	0.1	0.0
Withdrawal	0.2	0.0
Other	0.1	0.0

CAR =  $\frac{\text{Contraceptive Use}}{\text{Total Population}}$

Small text and graphics, possibly a continuation of the family planning data or a related chart.

Large green poster with text and graphics, possibly a map or a detailed chart related to family planning or health services.

## Checklist for Screening Clients Who Want to Initiate Use of the Copper IUD

First, be reasonably sure that the client is not pregnant. If she is not menstruating at the time of her visit, ask the client questions 1-6. As soon as the client answers YES to any question, stop, and follow instructions below.

YES	1. Have you had a baby in the last 3 months?	NO
YES	2. Did you have a baby less than 3 months ago, are you fully or nearly fully breastfeeding, and have you had an menstrual period since then?	NO
YES	3. Have you abstained from sexual intercourse since your last menstrual period or delivery?	NO
YES	4. Did you last menstrual period start within the past 12 days?	NO
YES	5. Have you had a miscarriage or abortion in the last 12 days?	NO
YES	6. Have you been using a reliable contraceptive method consistently and correctly?	NO

If the client answered YES to any one of questions 1-6, ask her to take a pregnancy test. If the client answers YES to any question, you can be reasonably sure that she is not pregnant. Proceed to questions 7-13. However, if the answer YES to question 6, the insertion should be delayed until 3 weeks after delivery. Ask her to come back at that time.

If the client answered NO to all of questions 1-6, pregnancy cannot be ruled out. The client should wait 3 weeks or use a pregnancy test.

To determine if the client is medically eligible to use an IUD, ask questions 7-13. As soon as the client answers YES to any question, stop, and follow instructions below.

NO	7. Do you have bleeding between menstrual periods that is unusual for you, or bleeding after intercourse takes?	YES
NO	8. Have you been told that you have any type of cancer in your genital region, esophagus, stomach, or pelvic soft tissues?	YES
NO	9. Within the last 3 months, have you had more than one sexual partner?	YES
NO	10. Within the last 3 months, do you think your partner has had another sexual partner?	YES
NO	11. Within the last 3 months, have you been told you have an STD?	YES
NO	12. Within the last 3 months, has your partner been told that he has an STD or do you know if he has had any symptoms - for example, penile discharge?	YES
NO	13. Are you HIV positive and have you developed AIDS?	YES

If the client answered YES to all of questions 7-13, proceed with the PELVIN EXAM.

If the client answered YES to question 7 or 8, an IUD cannot be inserted. Further evaluation of the client is required.

If the client answered YES to any of questions 9-13, she is not a good candidate for an IUD unless she can be sure her partner's condition can be reliably ruled out.

If the answer YES to the second part of question 12 and to a partner consistently using HIV-protective sex is not usually recommended. If she is doing effectively well on ART, the IUD may generally be inserted. HIV-positive women with AIDS who generally can not use IUDs.

During the pelvic exam, the provider should determine the position of the uterus (14-20).

NO	14. Is there any type of shape on the vulva, vagina, or cervix?	YES
NO	15. Does the client feel pain in her lower abdomen when you move the cervix?	YES
NO	16. Is there adenocarcinoma?	YES
NO	17. Is there profuse cervical discharge?	YES
NO	18. Does the cervix bleed easily when touched?	YES
NO	19. Is there an anatomical abnormality of the uterine cavity that will not allow appropriate IUD insertion?	YES
NO	20. Were you unable to determine the size and/or position of the uterus?	YES

If the answer to all of questions 14-20 is NO, you may insert the IUD.

If the answer to any of questions 14-20 is YES, the IUD cannot be inserted without further evaluation. See 1-3 for more information. See your instructions.
