

As published in

It's not easy to wade in the flood of 24/7 information, snag useful content, and make sense of it for dairy producers. Catching and delivering the good stuff is the job of dairy media editors. Here are some articles that they've put in print recently:

- "Why good fresh-cow dry matter intake improves profitability" by Dave Ohman, DVM, in *Progressive Dairyman*, March 12, 2015
- "Good mixer loading equals better TMR consistency" by Jeff Mikus, PhD, in *Progressive Dairy Canada*, April 2015
- "Optimizing rumen function to manage heat stress and milk fat depression" by Ilkyu Yoon, PhD, in *International Dairy Topics*, Volume 14, Number 3
- "Creating a winning culture on your dairy" by Travis Thayer, DVM, in *Progressive Dairyman*, June 12, 2015
