

CNA
Cordially Invites You to Attend

The CTE Equation

About 12 million high school and college students are enrolled in Career and Technical Education (CTE) programs across the nation. CTE programs play an important role in preparing high school students for life after graduation. They prepare learners for the world of work by introducing them to workplace competencies and make academic content accessible to students by providing it in a hands-on context. Congress is working on a revision of the Carl D. Perkins Career and Technical Education Act. Appropriators give the program over \$1 billion annually. So, how are these programs doing?

Education researchers and practitioners will present data from 2 new reports by CNA Education that map CTE Career Clusters to high-growth/high wage jobs, and the importance of education and private industry stakeholders working together to use labor market data to help inform student preparation.

Wednesday, October 21, 2015
10:00 A.M. – 11:00 A.M.
188 Russell Senate Office Building

.....

Presenters:

Opening remarks by **LIZA CORDEIRO**, Senior Marketing Advisor, CNA Education

Presenters include:

CHRISTINE MOKHER, Senior Research Scientist, CNA Education
JULIANA PEARSON, Associate Research Analyst, CNA Education
BRENDA DANN-MESSIER, Principal Research Scientist, CNA Education

Q & A with audience to follow presentation

Please RSVP by October 16th to rchatteji@wpllc.net and include “RSVP CNA Briefing” in the subject line of your email.
