# SYNC

SINGLE VISION LENSES MADE FOR THE WAY OUR EYES WORK TODAY.

Our SYNC lenses are designed to provide effortless, comfortable viewing adaptations to whatever your visually strenuous days demand.

The way human beings see the world has changed dramatically in recent years. Our viewing ranges have gone from distant horizons, to intermediate zones, to now primarily focusing on near tasks. Most of us simply don't realize the harmful effects this shift has had on our vision and our overall health.

The revolutionary design of SYNC lenses allows you to focus in all directions and distances – while your eyes remain relaxed – all day long. Not only does this alleviate eyestrain, it significantly reduces fatigue caused by our everyday near task routines.

**HOYA LENSES ARE ONLY AVAILABLE AT HOYA-AUTHORIZED EYE CARE PRACTICES**
