

2014 AND 2015 Saint ANN VARIETY SHOW

VIDEO DOWNLOAD INSTRUCTIONS

1. Send Brian Jones an email (@ brian.c.jones@ericsson.com) indicating your desire to access the files.
2. If you don't have an account, go to www.dropbox.com and sign up for one (it's free and takes no time).
3. You will receive an email link inviting you to access a shared folder with the video files contained inside. You will find two versions of each show in the folders: one is the full-quality HD large file which is suitable for large-scale presentations, and one is a smaller compressed version which is more appropriate to load and view on a phone or an tablet.
4. Once you access the folder, you can download the files to your computer (it may take a bit given the size of the films and the traffic from others also trying to download the files at the same time). Make sure you download the entire file, don't play it through the dropbox folder because that will only allow you access to the first five minutes.
5. The video files are in .mp4 and .mov formats which can be viewed through most media software programs such as Windows Media Player and Quicktime.
6. Enjoy the shows!

If you have any problems downloading the files, or would simply prefer not to access online, identical copies of the shows are available in the Saint Ann office on a limited number of memory sticks. Interested families may either bring a personal laptop into the office and transfer the files directly (a process which should take about 15 minutes), or may check one of the memory sticks out for the evening to do the transfer at home.

If you prefer, you may leave a memory stick (at least 32GB) for Brian Jones in the office or through backpack mail and he will copy the show(s) for you and deliver them back to the office the following day. And of course, should you have any questions at all, please direct them to Brian Jones.

Thanks very much for your patience and we hope you enjoy the shows!
