

Understanding the LEEDv4 NC Rating System

Instructor: Kris Callori, LEED Fellow, WELL AP, NM Architect

COURSE DESCRIPTION

This workshop focuses on LEED version 4 fundamentals, covering sustainability topics related to green building best practices. This course will assist industry professionals in understanding the key concepts of LEED version 4 and how to apply the New Construction Rating System. Key changes and improvements in the LEED version 4 Rating System will be identified. A deeper exploration of the credit categories will help attendees learn more about the prerequisites and credits available to their new construction projects. Activities and handouts will aid attendees in applying the information presented.
