Energy Code Inspections

As per the City of Rogers the Builders responsibilities are as follows:

Builder to supply, sign and install energy approved sticker inside of breaker panel or present a letter to the State HVAC section at the Health Department in Little Rock.

Visually Inspect:

- Duct seal all joints
- Duct insulation
- Seal all interior openings, light switches, receptacles, light fixtures, and duct penetrations through ceiling and walls, etc.

Thermo pan liners for plenums must be:

- Foil back insulation
- Duct board and metal

Install home insulation to manufacturer's installation instructions and energy codes.
