

## Call for Collaboration

The Medicare Improvements for Patients and Providers Act of 2009 (MIPPA) contains provisions to strengthen Medicare for low-income beneficiaries and reduce racial/ethnic disparities among Medicare patients. Through MIPPA, the federal government provides funding for the Aging and Disabilities Network to conduct outreach to low-income Medicare beneficiaries. This outreach is intended to educate and ultimately enroll more people in Medicare subsidy programs, namely the Medicare Savings Program (MSPs) and the Medicare Part D Extra Help/Low-Income Subsidy program.

The National Association of States United for Aging and Disabilities (NASUAD) is seeking to collaborate with disability organizations that already help people with one or more of the impairments that qualify individuals for SSI. We hope that collaborations with these organizations will raise awareness of the availability of these Medicare benefits to persons that may be eligible for extra help with their Medicare payments, but may not know about them.

NASUAD has created several resources to explain the Medicare Extra Help programs to individuals with disabilities. The goal of these resources is to better inform them of the MSPs that are available for people with low-income backgrounds. We encourage you to utilize them to the fullest extent possible. We also include a [tip sheet](#) – aimed at your staff – which offers a crash course in Medicare Low-Income Subsidies with background information, program details, and income and asset limits.
