

Prescriptive Delegation Waiver Requests

The board has authority to waive or modify any of the site or supervision requirements for a physician delegating prescriptive authority to advanced practice nurses or physician assistants. But the board's rules state that the board may grant a waiver *only if it determines good cause exists to grant a waiver.*

So what factors does the board take into account?

- Whether the existing prescriptive delegation requirements cause an undue burden to the patient population (not only to the requestor) without corresponding benefit to patient care.
- The quality and viability of safeguards that are proposed to ensure continued quality of patient care.
- The quality and viability of safeguards that are proposed to foster a collaborative practice between the physician and the physician assistant or advanced practice nurse.
- The requestor's type of primary practice and the type of practice conducted at the site for which a waiver is requested, including the populations served by the practices and duties assigned to mid-level practitioners.
- Whether the proposed frequency and duration of time the physician is on-site when the advanced practice nurse or physician assistant is present is sufficient for collaboration to occur, taking into consideration the other ways the physician collaborates with the advanced practice nurse or physician assistant at other sites.

Keep it friendly!

Let's say you and your partner in medical practice decide to go your separate ways. It's a less-than-friendly split, and when the departing physician requests the contact information for his patients, you're tempted to be unhelpful.

Take the high road instead – Texas Medical Board Rules require it.

Board Rule 165.5(c), Prohibition Against Interference, stipulates that:

(1) Other licensed physicians remaining in the practice may not prevent the departing physician from posting notice.

(2) A physician or physician group should not withhold information from a departing physician that is necessary for notification of patients.

Physicians who violate this rule may find themselves subject to non-disciplinary remedial plans or disciplinary orders.

The non-disciplinary remedial plans require payment of a \$500 administrative fee and may include that the physician complete continuing medical education and/or passage of the Medical Jurisprudence Exam.

Tick-borne Disease Awareness in Texas

Tick-borne disease is a year-round danger in Texas, but hunting season is a good time to remind everyone to take special precautions against ticks and be on alert for tick-borne illnesses. Diseases reported in Texas that can be transmitted to humans via the bite of an infected tick include Lyme disease, Rocky Mountain Spotted Fever, Southern Tick-Associated Rash Illness (STARI), Tularemia, and human Ehrlichiosis.

TMB encourages physicians, especially those potentially treating patients with tick-borne illnesses, to enhance their awareness and education of these diseases, including applicable treatment guidelines and methodologies, so that patient health and safety is addressed.

In 2011, the 82nd Legislature passed legislation (HB 2975/SB 1360) that encourages physicians whose practice includes the treatment of tick-borne diseases to take continuing medical education (CME) in the treatment of tick-borne diseases. The new law requires the TMB and the Texas Board of Nursing take into consideration a physician's participation in an approved CME course if: (1) the physician is being investigated regarding the physician's selection of clinical care for the treatment of tick-borne diseases; and (2) the physician completed the course not more than two years before the start of the investigation. After receiving stakeholder input, TMB adopted applicable rules in April 2012 which became effective in May 2012.

Physician Health Program fees lower in certain circumstances

Participation in the Texas Physician Health Program (TXPHP), which serves physicians, physician assistants, acupuncturists, and surgical assistants affected by substance use disorders, physical illnesses and impairment, and/or psychiatric conditions, costs \$1,200 per year.

However, there are exceptions:

- Medical residents pay \$600 the first year, and \$1,200 thereafter.

- The administrative fee for an evaluation only is \$300, which is applied to the annual fee if the individual decides to enroll.
- Participants experiencing financial hardship that can be demonstrated with a W-2 form pay \$300 the first year and \$600 thereafter.

TXPHP had 313 participants as of early October, with 211 referred by the Texas Medical Board and 102 self-referred. For more information, please call 512-305-7462.

Electronic Death Registration — Action Required!

If you will EVER be called upon to sign a death certificate, you MUST register **NOW** with the Texas Department of State Health Services to file the certificate electronically.

If you fail to do so, the Texas Medical Board may take disciplinary action against you. The extended “grace period” that you were given in order to allow you more time to register ended on June 1, 2011, and TMB IS enforcing the law.

You cannot wait until a death has occurred in order to register; that’s too late, because it takes DSHS seven-10 business days to process new enrollments. If you end up having to complete a paper death certificate because you didn’t timely register for electronic filing, the Texas Medical Board may take action based on the violation.

To register for electronic filing, follow this link:

<http://www.dshs.state.tx.us/vs/field/>

If you have problems registering, send an email to help-TER@dshs.state.tx.us or call the TER Help Desk line at 888-963-7111 ext. 3490.

See Tex. Health and Safety Code, §193.005

Neurosurgery experts needed

TMB is critically short of neurosurgery expert panelists to review records related to TMB complaint investigations. Expert panelists review records and write reports stating why the standard of care was or was not met in the situation under investigation.

Expert panelists must be in active practice, licensed in Texas, board-certified and not have any TMB disciplinary orders. For more information, email TMB Medical Director Robert Bredt, M.D., at Robert.bredt@tmb.state.tx.us

Formal Complaints

Formal Complaints have been filed with the State Office of Administrative Hearings against the individuals listed below. Formal Complaints are public documents and are posted on physician profiles on the TMB web site. To read the full complaint, go to www.tmb.state.tx.us, click on "Look Up A Licensee," accept the usage terms, and enter the licensee's name or license number.

The amendment also provides process for waivers of requirements.

New Standardized Autopsy Request Form Required for All Autopsies Performed in Texas

In 2011, a new law regulating consent to perform autopsies went into effect (HB 1009; CCP Art. 49.32). It explicitly set forth the process to consent to an autopsy, detailed the hierarchy for those who may consent to an autopsy and guaranteed certain rights to those requesting an autopsy. A lesser known provision was to have the Commissioner of State Health Services, in consultation with the Texas Medical Board, prescribe a standard written consent form for a postmortem examination or autopsy.

The consent form was completed in April 2012 and is available on the DSHS website (www.dshs.state.tx.us/New-Autopsy-Consent-Form.shtm). To be in compliance with state law, physicians and pathologists must obtain the written informed consent of a person authorized to provide consent utilizing the form prescribed. Even if facilities develop their own forms, this mandated form must be used. This form IS NOT required if an autopsy is ordered by a Justice of the Peace or Medical Examiners as part of a death inquest or ordered by the Texas Department of Criminal Justice.

LICENSURE ORDER

Gilliland, Mark, M.D., Houston

On November 30, 2012, the Board entered a final order regarding Mark Gilliland, M.D., issuing Dr. Gilliland a medical license subject to the following restrictions: Dr. Gilliland, whose license was revoked in 2007, may resume the practice of medicine only in a one-year ACGME-approved residency in General Surgery; following completion of the general surgery residency, Dr. Gilliland may continue the practice of medicine only in a two-year ACGME-approved residency in plastic surgery. Following completion of the residencies, Dr. Gilliland may practice in a group setting approved by the Board. In addition, Dr. Gilliland must abstain from prohibited substances, complete within one year eight hours of CME in ethics, continue in care and treatment with his addictionologist/counselor, participate in AA three times a week, refrain from serving as a physician for his family and refrain from supervising and delegating prescriptive authority to mid-levels. An administrative law judge who heard Dr. Gilliland's case at the State Office of Administrative hearings found that Dr. Gilliland that the reinstatement of his medical license is in the best interest of the public, and the Board adopted those findings of fact. Dr. Gilliland has 20 days from the receipt of this order to file for a rehearing.

TEMPORARY SUSPENSION/RESTRICTION

Ahlschier, Allan Dee, M.D., Lic. No. D7516, Houston

On December 14, 2012, a disciplinary panel of the Texas Medical Board temporarily suspended, with notice, the medical license of Allan Dee Ahlschier, M.D., requiring him to immediately cease practicing medicine. The Board found Dr. Ahlschier's continuation in the practice of medicine would constitute a continuing threat to the public welfare and that Dr. Ahlschier was engaging in the practice of improper and illegal prescribing of controlled substances without a medical basis. The temporary suspension remains in effect until it is superseded by a subsequent order of the Board.

Dailey, Warren Bertrand, M.D., Lic. No. F8454, Houston

On December 10, 2012, a disciplinary panel of the Texas Medical Board temporarily restricted, with notice, the medical license of Warren Bertrand Dailey, M.D., prohibiting him from prescribing Schedule II and III medications, except for methadone at the clinics where he is the medical director, and prohibits him from supervising or delegating prescriptive authority to physician extenders. The Board found Dr. Dailey's continued practice of medicine, including his involvement in the improper and illegal operation of pain clinics poses a continuing threat to public welfare. The temporary restriction remains in effect until it is superseded by a subsequent order of the Board.

Dorman, John Wesley, M.D., Lic. No. D5375

On December 14, 2012, a disciplinary panel of the Texas Medical Board temporarily suspended, with notice, the medical license of John Wesley Dorman, M.D., requiring him to immediately cease practicing medicine. The Board found Dr. Dorman's continuation in the practice of medicine would constitute a continuing threat to the public welfare and that Dr. Dorman was engaging in the practice of improper and illegal prescribing of controlled substances without a medical basis. The temporary suspension remains in effect until it is superseded by a subsequent order of the Board.

Focke, John H., III, M.D., Lic. No. E4336, College Station

On December 12, 2012, a disciplinary panel of the Texas Medical Board temporarily restricted, with notice, the medical license of John H. Focke, III, M.D., prohibiting him from supervising or delegating prescriptive authority to physician assistants and advanced practice nurses. The Board found Dr. Focke's continuation in the practice of medicine constitutes a threat to the public welfare based on his inadequate supervision of Howard N. Barbour, APN, an advanced practice nurse who was prescribing controlled substances without a legitimate medical need under Dr. Focke's supervision and prescriptive delegation. The temporary restriction remains in effect until it is superseded by a subsequent order of the Board.

Husaini, Innad Hasan, M.D., Lic. No. K6006, Houston

On December 4, 2012, a disciplinary panel of the Texas Medical Board temporarily restricted, with notice, the medical license of Innad Hasan Husaini, M.D., requiring Dr. Husaini to immediately surrender his DEA/DPS controlled substance certificates. Dr. Husaini is also prohibited from treating chronic pain patients and shall not supervise or delegate prescriptive authority to

physician extenders. The Board found that Dr. Husaini poses a continuing threat to the public welfare due to his improper and illegal operation of a pain management clinic based on his inappropriate ownership and unlawful method and manner of prescribing controlled substances. The temporary restriction remains in effect until it is superseded by a subsequent order of the Board.

Hyde, Linda Carol, M.D., Lic. No. J0011, Conroe

On December 7, 2012, a disciplinary panel of the Texas Medical Board temporarily restricted, with notice, the medical license of Linda Carol Hyde, M.D., requiring Dr. Hyde to immediately cease treating chronic pain patients and surrender her DEA/DPS controlled substance certificates. In addition, Dr. Hyde is prohibited from supervising or delegating prescriptive authority to physician extenders, may not prescribe for herself or her family and must surrender any Pain Management Certificates issued to her by the Board. The Board found Dr. Hyde's continued practice of medicine poses a continuing threat to public welfare, and that she failed to adequately supervise advanced nurse practitioners and/or physician assistants at two pain clinics. The temporary restriction remains in effect until it is superseded by a subsequent order of the Board.

Khuu, Chau Doan, M.D., Lic. No. M4838, Houston

On December 10, 2012, a disciplinary panel of the Texas Medical Board temporarily suspended, without notice, the medical license of Chau Doan Khuu, M.D., requiring Dr. Khuu to immediately cease the practice of medicine after determining that Dr. Khuu presents a continuing threat to the public welfare. The Board found that Dr. Khuu illegally operated a clinic as it related to the method and manner of prescribing controlled substances and failed to adequately supervise mid-levels working under his delegation and prescriptive authority. A temporary suspension hearing, with notice, will be held as soon as practicable with 10 days' notice to Dr. Khuu, unless the hearing is specifically waived by Dr. Khuu. The suspension remains in effect until the Board takes further action.

Kobs, Darcey Gus, III, M.D., Lic. No. H8180, Bellaire

On December 11, 2012, a disciplinary panel of the Texas Medical Board temporarily suspended, with notice, the medical license of Darcey Gus Kobs, III, M.D. The Board found that Dr. Kobs poses a continuing threat to the public welfare due to his improper operation of a pain clinic, failure to adequately supervise those acting under his supervision and failure to establish a proper

physician-patient relationship prior to prescribing a controlled substance. The temporary suspension remains in effect until it is superseded by a subsequent order of the Board.

Marks, Timothy N., M.D., Lic. No. J3719, Houston

On December 12, 2012, a disciplinary panel of the Texas Medical Board temporarily restricted, with notice, the medical license of Timothy N. Marks, M.D., prohibiting Dr. Marks from supervising PAs, APNs or other mid-level providers except for a Certified Registered Nurse Anesthetist in an interventional or surgical procedure in a hospital, surgical center or Board-approved office-based anesthesia setting; prohibiting Dr. Marks from ordering, prescribing, and dispensing scheduled drugs except while providing anesthesia services in a hospital, surgical center, or Board-approved office-based anesthesia setting; and prohibiting Dr. Marks from treating chronic pain patients with scheduled drugs other than with interventional anesthesia procedures that do not employ scheduled drugs. The Board found Dr. Marks is a continuing threat to the public welfare due to his participation in the illegal operation of a medical clinic and inadequate supervision of his delegates. The temporary restriction remains in effect until it is superseded by a subsequent order of the Board.

McClellan, David M., M.D., Lic. No. G0476, Crosby

On December 11, 2012, a disciplinary panel of the Texas Medical Board temporarily restricted, with notice, the medical license of David M. McClellan, M.D., prohibiting him from prescribing Schedules II, III, IV and V controlled substances to non-established patients. The Board found Dr. McClellan's continuation in the practice of medicine constitutes a threat to the public welfare based on his prescribing controlled substances without a legitimate medical need. The temporary restriction remains in effect until it is superseded by a subsequent order of the Board.

Melcher, Stephen, M.D., Lic. No. J0120, Sacramento CA

On August 3, 2012, a Disciplinary Panel of the Texas Medical Board temporarily suspended, without notice, the Texas Medical License of Stephen Melcher, M.D., after determining that Dr. Melcher poses a continuing threat to the public welfare. It is alleged that on October 11, 2011, Dr. Melcher molested an 11-year-old boy during a dinner party at his residence and an arrest warrant was issued for Dr. Melcher, charging him with that offense. On May 25, 2012, Dr. Melcher entered a plea of no contest to the charge of felony sexual act with a minor and was sentenced to one year in jail with

a five-year probationary term. Melcher's California Medical License was suspended in June. The suspension remains in effect until the board takes further action. Dr. Melcher has a right to another hearing, with notice, as soon as is practicable.

Nguyen, Ngoc X., M.D., Lic. No. J3173, Houston

On December 4, 2012, a disciplinary panel of the Texas Medical Board temporarily suspended, with notice, the medical license of Ngoc X. Ngyuen, M.D. The Board found that Dr. Nguyen poses a continuing threat to the public welfare due to his failure to adequately supervise mid-level providers and due to inappropriate prescribing of controlled substances. The temporary suspension remains in effect until it is superseded by a subsequent order of the Board.

Ramanathan, Subramaniam V., M.D., Lic. No. M0624, The Woodlands

On December 10, 2012, a disciplinary panel of the Texas Medical Board temporarily restricted, with notice, the medical license of Subramaniam V. Ramanathan, M.D., requiring him to cease treating chronic pain patients, refrain from supervising or delegating prescriptive authority to physician assistants and advance practice nurses, surrender any and all pain management certificates issued to him by the Board and surrender his DPS and DEA certificates for controlled substances. The Board found Dr. Ramanathan, who operated two pain management clinics, did not adequately supervise physician extenders and poses a continuing threat to public welfare. The temporary restriction remains in effect until it is superseded by a subsequent order of the Board.

Rockett, Carl, M.D., Lic. No. K8459, Houston

On December 10, 2012, a disciplinary panel of the Texas Medical Board temporarily restricted, with notice, the medical license of Carl Rockett, M.D., after determining that Dr. Rockett presents a continuing threat to the public welfare. The order prohibits Dr. Rockett from treating patients for chronic pain, from supervising or delegating prescriptive authority to physician-extenders and limits Dr. Rockett's prescription of scheduled drugs to the hospital or outpatient surgical setting for the sole purpose of providing anesthesia associated with procedures. The restriction remains in effect until it is superseded by a subsequent order of the Board.

Simmons, Clyde W., Jr., M.D., Lic. No. D7303, Houston

On December 10, 2012, a disciplinary panel of the Texas Medical Board temporarily restricted, with notice, the medical license of Clyde W. Simmons, Jr., M.D.,
