hypoplasia of vermis, bilateral cerebellar hemispheres connected with midline structure, thicken of bilateral testibrachium, mesencephalon deformation to grinding state. Bat wing shape of fourth ventricle upper area. No abnormal signals in brain parenchyma. Normal sulcus, gyrus of hemiencephalon lobes. No shifting of midline structure. Full of adenoid.

Expression: Joubert syndrome, full of adenoid.

Physician: XXX

Date: Nov. 4, 2013

## Growth Report for TRISTAN

TRISTAN, male, DOB: Sept. 7, 2006, he was picked up at the gate of No.1 yard, Street, West district of City on June 14, 2007, he wore blue vest, black pants and azure socks. After a lot of investigations has been done but tried to find his relatives in vain, he was sent to Street, West District Branch office of Police Station from June 14, 2007 to July 9, 2007 for instant raising, was sent into this institute by Street police station on July 9, 2007, lives in this institute since that day. His name origin: "" is because boys admitted in 2007 all have surname "", "" is hoping he could know how to behave and be a mature child; his DOB was decided according to his physical development and PE done by the doctor.

His current PE result: Joubert syndrome. Currently, he has been living in this institute for 5 years and 9 months, he is 6 years and 7 months now. During March 2011 to May 2011, Tristan was taking rehabilitation in Children's Hospital in City. Tristan is extrovert, smart, active and handsome. Tristan has some language comprehension ability, but has poor expressive ability, can make simple communication with others, can express his willing in simple language, but unclearly. After related rehabilitation training, he gradually walks alone without walker, can take on clothes, have meals and go to toilet without help, he can completely self-manage himself, Tristan would help other kids in daily activities. Tristan is taking kindergarten senior class related education, he likes class having most during a day, he takes part in every theme, often got praise from teachers. In the game class, he would share fun of group games. In recognition class, he would keep what teachers say in mind, nod when teachers speaking content he familiar with. In language class, TRISTAN studies stories of Brother egg and Cloud baby, he likes colorful pictures in the story, TRISTAN can say "This is brother egg" "I like cloud baby". TRISTAN takes part in various performs, performs many programs with other kids, especially in the puppet show "pull out carrots", TRISTAN operates the puppet grandma flexible, which

made other children laugh.

TRISTAN lives regular life, gets up at 6:30, goes to sleep at 20:30, take a siesta for 2 hours. He has 3 meals a day, can eat all kinds of food, has average amount, good appetite, likes to eat sweet food and apples. He can go to sleep alone, sleeps well, has no other bad sleeping habits. He has been vaccinated up to date.

### State of Growth of Prospective Adoptive Child (3-6 years)

Child's name: TRISTAN

Welfare Institute: Children's Welfare Institute of City

Date: May 2013

Sex: Male

DOB: Sept. 7, 2006

Birth place:

The baby is institutionalized:  Intake time: July 9, 2012

Fostered:  Intake time:

Weight: 16.5 kg Height: 97.5cm Head circumference: 52 cm

Chest circumference: 55 cm Number of teeth: 20

Health History:

Routine schedule: Please describe when the baby gets up, has a nap after lunch, goes to bed at night and his/her meals? How many times does he/she urinate or defecate in a day?

He gets up at 6:30 and goes to bed at 20:30, take a siesta for 2 hours,; defecates once and urinates about 8 times per day.

Sleep:

Deep sleep  Moderate sleep  Light sleep  Dreamy sleep

In sleep he/she is liable to suck finger  or suck soother  or something else:

Eating:

Please describe the frequency and volume of milk per day, and when and what kind of supplementary foods are added: He has 3 meals a day, can eat all kinds of food, has average amount, good appetite, likes to eat sweet food and apples.

Motor development:

Goes upstairs and downstairs without help  Jumps off floor with both feet

Imitates drawing vertical lines  imitates drawing circles

Skips on one foot alternately

Imitates drawing crosses  Goes up stairs one foot per step

Stands on one foot alone for 5 seconds

Imitates drawing squares ✓

Draw a person with three parts(such as head, ears, lips, nose, eyebrows, arms, legs, hands, feet) ✓

Picks up peanuts with chopsticks□

Catches a ball thrown to him/her ✓

Draws seven to ten parts of a person□

Walks 2m forward tiptoe against heel alternately□

Writes his/her own name□                      Ties a shoelace □

Adaptability:

Knows “big” and “small” ✓    Knows “inner” and “outer” ✓

Recognize “red” color ✓    Knows two kinds of colors✓    Count two blocks✓

Recognizes the shape of triangle, square and circle✓    Counts five blocks✓

Knows “left” and “right” ✓    Knows every day of a week✓

Language and sociality:

Speaks a sentence of 5-10 words✓    Asks “what’s it?” on his/her own initiative✓

State the purpose of daily used commodities ✓

Takes off unlined clothes✓    Knows “Male” and “Female” ✓

Knows “cold” “tired” and “hungry” ✓    Able to button or unbutton✓

Able to speak the antonym of a word✓    Able to put on clothes by him/herself✓

Knows the answer to “how many pieces are there when an apple is cut once?”□

Knows the answer to “why should you wash your hands before meals?” ✓
