

**CEE STUDENTS RECOGNIZED AT THE 17<sup>TH</sup> ANNUAL NCE SALUTE TO  
ENGINEERING EXCELLENCE AWARDS:**

**ANTHONY CALVANO**

A senior from Milltown, Anthony received two of NCE's highest honors. He has been named the Outstanding Senior in CEE and he is also NCE's Outstanding Senior for the year. Anthony credits his interest in civil engineering to his frequent car trips on the New Jersey Turnpike. "My family would often attend New York Jets games and on our drives on the turnpike to and from the stadium, along with the great view of New York and Newark, I would look out the window at the highways and bridges." It was during these rides that he realized he wanted

to work on the basic infrastructure that forms the backbone of our region.

On campus, Anthony is a peer mentor and co-leader of an Engineers without Borders team designing a clay pot water filtration system for businesses and residences in Milot, Haiti. Off campus, Anthony has interned for the Port Authority on projects at Newark Liberty International Airport and the Bayonne Bridge. He is interested in working in developed areas such as New York and New Jersey, because, as he puts it, "the majority of the land is already in use, which adds many challenges and constraints to projects, but also makes them very interesting." Anthony will soon get his wish. Starting in July, he will begin working as an engineer for Mueser Rutledge Consulting Engineers in New York City.
