CLINIC CORNER

June is Men's Health Month

Health Facts for MEN:

- Prostate cancer is the leading [cancer for men](#) in the US. It is followed by lung cancer and then colorectal cancer.
- Heart disease is the most common cause of death for men in the U.S. A healthy diet and lifestyle are the most common contributors to good [cardiovascular health](#).
- Depression is under-diagnosed in men. Men are over four times more likely than women to commit suicide. Don't ignore [men's mental health](#).

****New for 2016****

In addition to our [basic services](#) we now offer health preventative services:

Physicals	Pap smears
STD/STI testing	Treatment of Vaginal infections
