

Submission Deadline

Applicants are encouraged to contact Marian Adair at The Nature Trust of BC to discuss their project and its eligibility for funding support.

There is one submission date for funding applications each year. All applications must be received on or before **February 12, 2016 at 4:30pm.**

Applicants can either provide a **complete application** by email or delivered paper copy to **Marian Adair:**

The Nature Trust of British Columbia

260 – 1000 Roosevelt Crescent
North Vancouver, BC V7P 3R4

Fax: (604) 924-9772
Toll Free: 1-866-288-7878
Email: madair@naturetrust.bc.ca

Funding Availability

Funding varies from year to year. Available funding in 2016 is \$2500. With this level of funding, it is anticipated that only one project will be awarded in 2016.

Recipients will be recognized in The Nature Trust of BC's media outlets.

Background

Grasslands are rare, unique, life-sustaining ecosystems. More than 30% of BC's threatened or endangered species depend on grasslands for their survival. BC's grasslands represent less than 1% of the provincial land base and one of Canada's most endangered ecosystems. Native grasslands provide critical habitat corridors for dozens of migratory species that move between northern and southern latitudes of North America. Historically, many of these grassland ecosystems occupied more of BC's land base. However, with urban expansion, other development activities, and agricultural use, native grasslands have become significantly diminished. The challenge is to balance the conservation of critical wildlife habitat in the remaining native grasslands with ongoing activities of sustainable resource use and development, along with processes such as climate change. It is necessary to gain a better understanding of how the land can be managed to address this challenge.

The Brink/McLean Grassland Conservation Fund, established by The Nature Trust of BC in May 2001, honours two of Canada's most celebrated conservationists and past Board members (Dr. Bert Brink and Dr. Alastair McLean) who devoted much of their lives to conserving BC's native grasslands.

The Nature Trust of BC continues to accept donations for the Brink/McLean Grassland Conservation Fund, so that we can continue to award projects that help us gain a better understanding of grassland management.

Brink/McLean Grassland Conservation Fund

HOW TO APPLY FOR PROJECT FUNDING

Project Application Information

The **objective** of the Brink/McLean Grassland Conservation Fund is to promote research, habitat restoration and other stewardship activities that will assist in the management of the land, plants and animals of BC's native grasslands.

Eligible Projects

Project must be located in BC. Proponents may be individuals, conservation organizations, public agencies, academic or research entities. Applications must demonstrate how the project meets the evaluation criteria.

Projects more likely to receive funding will be related to:

- Enhancing critical grassland habitats for plants and wildlife.
- Demonstrating how best to use sustainable resource management and land-use practices so that grasslands and species that rely on them flourish.
- Identifying practical management considerations or results for grassland ecosystems.

Activities considered for funding include:

- Scientific research.
- Inventory and assessment.
- Enhancement or restoration.
- Evaluation and monitoring.
- Design or planning related to how current land-use or management practices can be refined to conserve and/or improve management of native grassland habitats.

Examples of projects not acceptable for funding support include:

- Administrative costs for interest groups or organizations.
- Compensation for individual "losses" attributed to the conservation of grassland habitats.
- Promotion of private sector business opportunities.

Evaluation Criteria

- Achieves the Brink/McLean Grassland Conservation Fund's objective
- Addresses a need or problem related to grassland ecosystem management
- Identifies tangible outcomes and is realistic in scope
- Complements work of other agencies and organizations or conducted in partnerships with other groups, whenever possible
- Does not duplicate work of other agencies and organizations
- Based on sound biological principles
- Conforms with established practices, legislation and policies
- Experience, knowledge, and competency of the applicant
- Completeness and quality of the application

Although not a requirement, bonus points will be given to projects that include The Nature Trust of BC's properties.

Award of project funding support will be announced March 4, 2016.

Application Requirements

Applications should be no more than 5 pages and include the following 3 sections:

- 1. Project description and rationale**
Describe why this project is necessary and its relevance to the Fund's objective, the project's objectives, anticipated outcomes, time frame, description of work plan or methodology, and the deliverables.
- 2. Project location**
Include a legible map with the location of the project and specific properties identified.
- 3. Budget**
Identify proposed itemized expenditures of fees and disbursements, contributions by the proponent and/or other partners and whether this funding is confirmed, and amount requested from the Brink/McLean Grassland Conservation Fund.

Applicant Credentials (not included in the 5 page limit)

- Qualification materials (e.g. resumes of key individuals involved in the project).
- Letter(s) of support, if applicable.

Complete copies of the application package are required whether submitted electronically or in hard copy.

Review Process

The Nature Trust of BC reserves the right not to award all or part of the available funding in any particular year.

Applications will be reviewed and awarded by The Nature Trust of BC staff based on the evaluation criteria.
