

My Blue Dots Research Support

"The annual payout from My Blue Dots Fund has been instrumental for Dr. Albert Koong to establish a robust translational research program in GI Oncology that has allowed him to pursue "high- risk, high-reward" projects that would not normally be supported by traditional mechanism.

Dr. Koong is a model teacher and the most sought-after mentor in our department. But most importantly, he is a superb physician-scientist, internationally renown not only for his research and clinical expertise, but the wonderful care he provides to his patients and the innovation he has integrated into such care."

Dr. Quynh-Thu Le, MD, FACR Professor and Chair Department of Radiation Oncology Stanford University
