## You Will:

- **Learn** effective strategies to **offer guidance** through respect and mutuality.
- **Gain insights** that will **improve relationships** with **youth in your life**.
- **Appreciate the impact of trauma** on the brain and learn useful strategies for successfully working with those affected.
- **Feel for yourself** how **powerful** and **effective** experiential teaching activities are at deepening understanding and helping people learn in their hearts, not just their heads -- the key to actually *doing* things differently.
- **Observe teaching and facilitation methods** (based on Adler's ideas about adult learning) that you **can use in your work with families**, either one-on-one or in groups. Discover the **benefits** of acting as a coach rather than an expert. Practice these methods in a safe and supportive environment.
- **Leave feeling encouraged** and **empowered**, with new tools to help parents and new ways to present them. Your own family and relationships may benefit as well.
