

BREAK FREE FROM FOSSIL FUELS: May Mobilization

During this past May, on six continents, thousands of people took bold action to keep coal, oil and gas in the ground as part of an international campaign called **Break Free From Fossil Fuels**. Break Free showed what the climate movement can do in 2016. Led by 350.org, and many partner organizations, Break Free was another demonstration of the power of collaboration in the movement to preserve a livable planet. Elders Climate Action endorsed and participated in Break Free actions in New York, Illinois, and Indiana.
