

## SPRING PERFORMANCE

*A high performance foliar program to enhance turf color, improve rooting, and increase carbohydrates. Helps turf repair from winter damage and prepare for summer stress.*

**If Old Man Winter did this to your turf...**

**Foliar-Pak® can get your turf back to this**

Begin program at first mowing. For maximum recovery, repeat application every 7 to 14 days. As with all foliar applications, best results are achieved when turf is not subjected to frost conditions.

<i>Product</i>	<i>Benefits</i>	<i>Rate / 1000 sq. ft.</i>
