

Build Your Skills and Maximize Your Knowledge of Early Learning

Child Care Aware® training and professional development opportunities help you advance your career.

I've taken the training... now what?

Katie has been a family child care provider for 14 years. Now that her own children are in school, she wants to close her home child care business and work in a preschool or Head Start program. However, her prior training hours don't add up to meet the requirements for the job she wants. With some thoughtful planning, Katie can quickly qualify for Category B on the Career Pathways.

Training

is an opportunity to learn new skills, increase your knowledge and prepare for the work you do.

Child Care Aware® offers over 100 online and face-to-face training opportunities to fit your needs.

Professional Development

helps you perfect skills, maximize your knowledge, and advance your career.

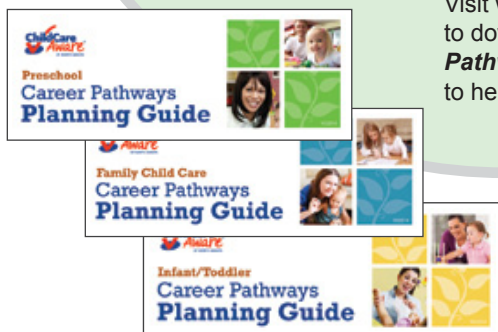

- Work with a Child Care Aware® Consultant, Coach or Mentor
- Join a Professional Organization
 - Earn your CDA Credential
- Complete an Environment Rating Scale Assessment
 - Join Bright & Early
