SKYWARD

What is Skyward?

Skyward is the school management and business suite used by all BCSD employees, students, and parents.

| For Staff | For Families |
|---------------------|-----------------------|
| Gradebook | Time Off |
| Report Cards | Check History |
| Attendance | Fee Management |
| Calendar | Lunch Program |
| Discipline | |

Skyward is the primary resource for students, parents and staff. Accurate and timely information is critical to students' success. Assignment and test grades are normally posted one to two weeks after due date.

mileposts

What is Mileposts?

Mileposts is a progress monitoring and intervention support program that empowers teachers to work together to create individualized learning plans, manage interventions, and monitor achievement for students.

Plans & Interventions Progress Monitors Reports

Mileposts is used to compose a narrative of student growth so the BCSD educators can work together to scaffold and support every student's academic, social and emotional growth from one year to the next. A reliable Mileposts record takes the guesswork out of getting to know your students' individual needs from one year to the next. Instead, it communicates the responses to intervention that worked for individuals and groups of students the moment they step foot into your classroom.

edline

What is Edline?

Edline is the School District public website. It is used by BCSD schools, staff, teachers, and classes to communicate school activities. Its objective is to effectively share relevant and timely information and access to additional resources and materials for students, parents, prospective staff, students, and the general public.

Edline can effectively shine the light on questions about district, school, and classroom for both enrolled and prospective parents and students.

Use Edline to extend your classroom culture beyond the limits of your physical learning space, provide access to relevant information and timely resources, and support parents and students.

Links to Online Tools (Google)

Student Data Privacy

The Blaine County School District takes the privacy and protection of student data very seriously.

To ensure that each of us is doing all that we can to safeguard students' information and data, it is expected that you take the time to read and understand the terms of use and privacy policies for any online program or tool that you use with your students.

Questions to ask yourself while learning more about a product's terms of use and privacy policy include:

- What information is collected, and is it necessary to be able to use the program?
- Can collected information personally identify a student and how to contact him or her?
- Where is this information stored?
- Who has access to collected information?
- Does the website allow parents to review the information that has been collected about their student(s) and to request that any information about their student(s) be removed?

All products that you introduce to your classroom must also be compliant with COPPA, CIPA, FERPA, and PPRA.
