

TCHD realizes that we all travel different paths that take us where we are in life. These paths, whether through choices of our own or aspects we have no control over, play a role in shaping a picture of health for each one of us. To improve the health of all residents of the Tri-County jurisdiction, we need to understand these paths and how they can influence our health.

To tackle issues at this level, public health must look outside its traditional understanding of addressing health and begin to ask why disparities exist and what are the drivers of these disparities. How can we use data to target our efforts to address inequality? What do we need to do differently in our communities to address the root causes of poor health?

Opportunity and CommunityThe ability to access opportunities that allow individuals to fulfill their life goals and passions are often tied to education, income, employment,

and healthcare. These form the foundation for opportunities in all our lives. However, adequate education, income, employment, and healthcare are often not equally available depending on where you live.

Opportunity and Race

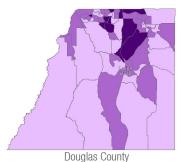

Race is an important component looking at access to opportunities in Douglas County and Colorado as a whole. Racial divisions can be seen across economic

lines, neighborhoods, and opportunity indicators. People of color generally fare lower in educational achievement, income, employment, and insurance status than their white counterparts.

Race and Where you Live Matter in Douglas County **=**

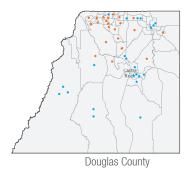

The ability to choose paths leading to opportunity and health can be influenced by our race and where we live. People of color generally do not experience the same opportunities in life as compared to white residents

Percent of the Population who are People of Color

- 5% 13% of Population are People of Color
- 13% 20% of Population are People of Color
- 20% 30% of Population are People of Color

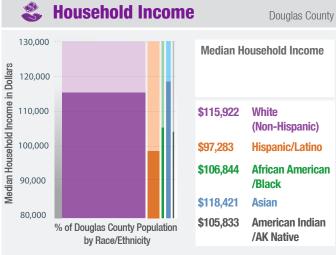

Opportunity of Life Indicators

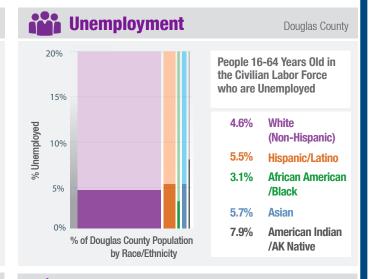

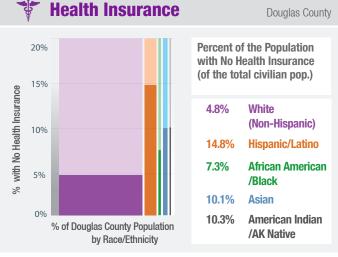

- Highest Scores Related to Education, Unemployment, Income, and Health Insurance (Opportunity of Life Indicators)
- Lowest Scores Related to Education, Unemployment, Income, and Health Insurance (Opportunity of Life Indicators)

Opportunity Indicators represent the accumulation of indicators related to education, employment, income, and health insurance. For those tracts below the county average, they receive an orange dot and for those above the county average, they receive a blue dot. Clustering of blue dots, indicate communities experiencing greater levels of opportunity while clustering of orange dots indicate communities with less opportunity.

Educational Attainment Douglas County 100% People 25+ Years Old with a Bachelor's Degree or **Higher Education** 75% Bachelor's Deg or Higher 56 9% White (Non-Hispanic) 50% 35.5% Hispanic/Latino African American 50.5% 25% /Black 73.0% **Asian American Indian** 28.1% % of Douglas County Population /AK Native by Race/Ethnicity

Health and Race in Douglas County The ability to choose paths that lead to good health can be influenced by our race and where we live. Different race/

ethnicities in the same community can experience different health outcomes. These differences need to be acknowledged as we address health issues in a community.
