

Next Generation Enrollment, Inc.

Next Generation Enrollment, Inc. has two Excel macro developer positions open to start mid-May.

XML File Template Developer

This position requires experience with creating XML file templates for use in transmitting information to the IRS through the e-File portal. Schema file structure and field attributes will be provided for the creation of the template. Other duties include testing the file with Excel macros and test transmissions to the IRS.

Excel Macro Developer

This position requires experience with building macros using Excel VBA. A series of macros will be created to format data files, utilize inputs to derive values for fields, and combine the files in an XML template and a .csv template. Other duties include testing the macros with various data files.

Applications can be submitted on [Hokies4Hire](https://www.hokies4hire.com/). For more information contact Erik Garcia at egarcia@nextgenerationenrollment.com.
