

Storage 101X : An Introduction to Data Storage and Management Technologies MOOC

You are invited to join us for a very special, online training event – and it's FREE!

If you are a student in Information Technology or an IT professional seeking a career in the storage industry, then Storage101x is a great foundational course to start learning about enterprise storage. Today, technology trends such as cloud computing, Big Data, and the Internet of Things are all changing the way data is processed, stored, and used in enterprises.

In this course you'll learn about the different types of enterprise storage systems and storage networking technologies. You also learn the basic concepts of business continuity, storage security, and storage management. Furthermore, this course will enable you to explore key concepts of cloud computing and examine some of the new trends in the storage industry.

This free course is offered by NetApp in partnership with IEEE and edX. Registration is open now – don't miss your opportunity to take advantage of this very special training event!
