

On Tuesday, March 8th we will be opening 3 of our locations to interested college graduates for a sales career test drive.

The day will start with breakfast and an overview of Electronic Systems, Inc. You'll meet the key players and be guided on a tour of our facilities.

Next, you'll get to test drive a day in the life at ESI when you will go out in the field with one of our sales representative and see what it's like to engage with and learn about local businesses and how they use technology every day. You will have 3 hours of one-on-one access to a sales professional that was where you are just a few years ago. Come see what waits for you here at ESI.

Register today, there are limited spaces at each location.
