

Roto Frank Opens New Doors at Fensterbau/Frontale

Roto Frank opened new doors and opened some eyes at the 2016 Fensterbau/Frontale trade show held from March 16-19 in Nuremburg, Germany.

The Roto Frank exhibit drew a steady stream of visitors and featured a number of innovative products, including the new Roto Patio Inowa sliding system, with its comfortable and simple “smart sliding” sash operation, as well as the Roto Eifel zero barrier threshold system for swing doors, with extraordinary water tightness tested up to more than 14 PSF.

Also generating excitement among Roto visitors was the addition of product lines from two newly

acquired Roto Frank companies – the Deventer Group, a leading specialist in sealing profiles for windows, doors, gates, frames and glazing, and Peder Nielsen (PN), a top supplier of hardware systems for outward opening windows and doors.

“The Fensterbau show has been extraordinary and the reaction we’ve gotten from visitors from The Americas to our exhibit has been overwhelming,” said Chris Dimou, President and CEO of Roto North America “This has been a great opportunity for us to showcase some of our newer, innovative products,” added Antonios Bountzouklis, Roto Frank’s Product Manager in North America.

About Roto North America

Roto North America comprises Roto Frank of America and Roto Fasco Canada. Founded in 1979, Roto Frank of America is a Chester, Connecticut-based manufacturer of window and door hardware.
