

## **Maintenance Department**

We are monitoring the supply very closely and making minor adjustments daily. As of today I feel pretty confident that we will get through this drought. A few more days of rain would be a blessing for us and all of the people, fish and fire fighters who are in need of it. Some of the course is browning of from the wind and lack of moisture, we do water these areas, but we also need to conserve what we have. We will keep your playing conditions as good as we can. Our greens will always be in top shape.

Thank you and good golfing to everyone

Geoff Sheffield

Course Superintendent
