

# 1-DAY ACUVUE® TruEye® Brand Daily Disposable Contact Lenses

## 90-PACK INVENTORY PROGRAM

1-DAY ACUVUE®  
TruEye®  
BRAND CONTACT LENSES

### SAVE NOW ON 1-DAY ACUVUE® TruEye® 90-PACK INVENTORY

**Help keep eyes in their natural state all day and over time<sup>1</sup>**  
**Exceptional Comfort**  
**Superior UV Protection<sup>†\*</sup>**

**Carry inventory in office and provide added convenience for patients buying less than an annual supply. For a limited time, save on your in-office inventory order of 1-DAY ACUVUE® TruEye® Brand 90-packs.**

#### PROGRAM TIMING:

- April 20 through June 30th

#### PROGRAM PRICING:

- Tier 1: \$3.00 off 100-300, 90-pack boxes
- Tier 2: \$2.50 off 30-99, 90-pack boxes

#### HOW IT WORKS:

- Customers can join the program at any time during the program. Limited to a 1-time purchase within the time frame of the program

These **Inventory Programs** complement the newly launched **Annual Supply Savings Packs**. The **Annual Supply Savings Pack** allows you to offer **built in savings** to patients and helps you increase annual supply dispense (arrives as 24 individual 30-Pk boxes), while the **Inventory Program** provides **convenience to patients** who prefer to buy less than an annual supply and want to leave your office with lenses in hand.

ACUVUE® Brand Contact Lenses are indicated for vision correction. As with any contact lens, eye problems, including corneal ulcers, can develop. Some wearers may experience mild irritation, itching or discomfort. Lenses should not be prescribed if patients have any eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. Consult the package insert for complete information. Complete information is also available from VISTAKON® Division of Johnson & Johnson Vision Care, Inc., by calling 1-800-843-2020 or by visiting [acuvueprofessional.com](http://acuvueprofessional.com).

† Helps protect against transmission of harmful UV radiation to the cornea and into the eye.

\* WARNING: UV-absorbing contact lenses are NOT substitutes for protective UV-absorbing eyewear such as UV-absorbing goggles or sunglasses because they do not completely cover the eye and surrounding area. You should continue to use UV-absorbing eyewear as directed. NOTE: Long-term exposure to UV radiation is one of the risk factors associated with cataracts. Exposure is based on a number of factors such as environmental conditions (altitude, geography, cloud cover) and personal factors (extent and nature of outdoor activities). UV-blocking contact lenses help provide protection against harmful UV radiation. However, clinical studies have not been done to demonstrate that wearing UV-blocking contact lenses reduces the risk of developing cataracts or other eye disorders. Consult your eye care practitioner for more information.
