## Townhouses and Condos

### Charlotte County

Summary Statistics	April 2016	April 2015	Percent Change Year-over-Year
Closed Sales	136	155	-12.3%
Paid in Cash	77	115	-33.0%
Median Sale Price	\$160,000	\$149,900	6.7%
Average Sale Price	\$196,303	\$189,504	3.6%
Dollar Volume	\$26.7 Million	\$29.4 Million	-9.1%
Median Percent of Original List Price Received	94.1%	94.6%	-0.5%
Median Time to Contract	40 Days	47 Days	-14.9%
Median Time to Sale	90 Days	83 Days	8.4%
New Pending Sales	112	103	8.7%
New Listings	133	97	37.1%
Pending Inventory	140	120	16.7%
Inventory (Active Listings)	512	472	8.5%
Months Supply of Inventory	5.7	5.1	11.8%

## Closed Sales

The number of sales transactions which closed during the month

**Economists' note:** Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately represented by year-over-year changes (i.e. comparing a month's sales to the amount of sales in the same month in the previous year), rather than changes from one month to the next.

Month	Closed Sales	Percent Change Year-over-Year
<b>April 2016</b>	<b>136</b>	<b>-12.3%</b>
March 2016	115	-17.3%
February 2016	78	-20.4%
January 2016	77	37.5%
December 2015	89	-8.2%
November 2015	70	22.8%
October 2015	77	5.5%
September 2015	98	30.7%
August 2015	73	-11.0%
July 2015	73	-13.1%
June 2015	86	0.0%
May 2015	102	-1.9%
April 2015	155	21.1%

# Monthly Market Detail - April 2016

## Townhouses and Condos

### Charlotte County

## Cash Sales

The number of Closed Sales during the month in which buyers exclusively paid in cash

**Economists' note:** Cash Sales can be a useful indicator of the extent to which investors are participating in the market. Why? Investors are far more likely to have the funds to purchase a home available up front, whereas the typical homebuyer requires a mortgage or some other form of financing. There are, of course, many possible exceptions, so this statistic should be interpreted with care.

Month	Cash Sales	Percent Change Year-over-Year
April 2016	77	-33.0%
March 2016	82	-18.0%
February 2016	64	-25.6%
January 2016	47	4.4%
December 2015	67	1.5%
November 2015	50	35.1%
October 2015	55	17.0%
September 2015	68	15.3%
August 2015	41	-25.5%
July 2015	44	-34.3%
June 2015	57	-12.3%
May 2015	70	-1.4%
April 2015	115	15.0%

## Cash Sales as a Percentage of Closed Sales

The percentage of Closed Sales during the month which were Cash Sales

**Economists' note:** This statistic is simply another way of viewing Cash Sales. The remaining percentages of Closed Sales (i.e. those not paid fully in cash) each month involved some sort of financing, such as mortgages, owner/seller financing, assumed loans, etc.

Month	Percent of Closed Sales Paid in Cash	Percent Change Year-over-Year
April 2016	56.6%	-23.7%
March 2016	71.3%	-0.8%
February 2016	82.1%	-6.5%
January 2016	61.0%	-24.1%
December 2015	75.3%	10.7%
November 2015	71.4%	10.0%
October 2015	71.4%	10.9%
September 2015	69.4%	-11.8%
August 2015	56.2%	-16.2%
July 2015	60.3%	-24.4%
June 2015	66.3%	-12.3%
May 2015	68.6%	0.4%
April 2015	74.2%	-5.0%

# Monthly Market Detail - April 2016

## Townhouses and Condos

### Charlotte County

## Median Sale Price

The median sale price reported for the month (i.e. 50% of sales were above and 50% of sales were below)

**Economists' note:** Median Sale Price is our preferred summary statistic for price activity because, unlike Average Sale Price, Median Sale Price is not sensitive to high sale prices for small numbers of homes that may not be characteristic of the market area. Keep in mind that median price trends over time are not always solely caused by changes in the general value of local real estate. Median sale price only reflects the values of the homes that *sold* each month, and the mix of the types of homes that sell can change over time.

Month	Median Sale Price	Percent Change Year-over-Year
<b>April 2016</b>	<b>\$160,000</b>	<b>6.7%</b>
March 2016	\$153,000	5.5%
February 2016	\$146,950	20.0%
January 2016	\$145,000	2.7%
December 2015	\$135,000	-0.7%
November 2015	\$141,000	0.7%
October 2015	\$125,000	-9.1%
September 2015	\$143,750	25.0%
August 2015	\$130,500	4.4%
July 2015	\$150,000	22.7%
June 2015	\$135,250	2.5%
May 2015	\$168,400	22.7%
April 2015	\$149,900	11.9%

## Average Sale Price

The average sale price reported for the month (i.e. total sales in dollars divided by the number of sales)

**Economists' note:** Usually, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

Month	Average Sale Price	Percent Change Year-over-Year
<b>April 2016</b>	<b>\$196,303</b>	<b>3.6%</b>
March 2016	\$168,790	-6.2%
February 2016	\$179,120	27.9%
January 2016	\$188,102	-3.9%
December 2015	\$172,137	-4.5%
November 2015	\$165,934	-8.2%
October 2015	\$150,955	-8.5%
September 2015	\$194,571	42.9%
August 2015	\$154,554	-8.6%
July 2015	\$189,116	24.6%
June 2015	\$183,593	9.9%
May 2015	\$235,669	29.0%
April 2015	\$189,504	9.2%

# Monthly Market Detail - April 2016

## Townhouses and Condos

### Charlotte County

## Dollar Volume

The sum of the sale prices for all sales which closed during the month

**Economists' note:** Dollar Volume is simply the sum of all sale prices in a given time period, and can quickly be calculated by multiplying Closed Sales by Average Sale Price. It is a strong indicator of the health of the real estate industry in a market, and is of particular interest to real estate professionals, investors, analysts, and government agencies. Potential home sellers and home buyers, on the other hand, will likely be better served by paying attention to trends in the two components of Dollar Volume (i.e. sales and prices) individually.

Month	Dollar Volume	Percent Change Year-over-Year
April 2016	\$26.7 Million	-9.1%
March 2016	\$19.4 Million	-22.4%
February 2016	\$14.0 Million	1.8%
January 2016	\$14.5 Million	32.1%
December 2015	\$15.3 Million	-12.4%
November 2015	\$11.6 Million	12.7%
October 2015	\$11.6 Million	-3.5%
September 2015	\$19.1 Million	86.8%
August 2015	\$11.3 Million	-18.6%
July 2015	\$13.8 Million	8.3%
June 2015	\$15.8 Million	9.9%
May 2015	\$24.0 Million	26.5%
April 2015	\$29.4 Million	32.2%

## Median Percent of Original List Price Received

The median of the sale price (as a percentage of the original list price) across all properties selling during the month

**Economists' note:** The Median Percent of Original List Price Received is useful as an indicator of market recovery, since it typically rises as buyers realize that the market may be moving away from them and they need to match the selling price (or better it) in order to get a contract on the house. This is usually the last measure to indicate a market has shifted from down to up, so it is what we would call a *lagging* indicator.

Month	Med. Pct. of Orig. List Price Received	Percent Change Year-over-Year
April 2016	94.1%	-0.5%
March 2016	93.9%	-0.8%
February 2016	95.4%	3.9%
January 2016	95.6%	2.0%
December 2015	95.1%	1.5%
November 2015	94.5%	-0.3%
October 2015	95.6%	1.8%
September 2015	93.9%	-0.5%
August 2015	94.1%	1.8%
July 2015	94.5%	2.2%
June 2015	94.0%	2.0%
May 2015	93.7%	0.2%
April 2015	94.6%	2.4%

## Median Time to Contract

The median number of days between the listing date and contract date for all Closed Sales during the month

**Economists' note:** Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the month. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

Month	Median Time to Contract	Percent Change Year-over-Year
April 2016	40 Days	-14.9%
March 2016	52 Days	10.6%
February 2016	33 Days	-56.6%
January 2016	48 Days	-27.3%
December 2015	48 Days	-4.0%
November 2015	47 Days	0.0%
October 2015	33 Days	-31.3%
September 2015	66 Days	3.1%
August 2015	53 Days	-33.8%
July 2015	87 Days	40.3%
June 2015	50 Days	-7.4%
May 2015	59 Days	-6.3%
April 2015	47 Days	-21.7%

## Median Time to Sale

The median number of days between the listing date and closing date for all Closed Sales during the month

**Economists' note:** Time to Sale is a measure of the length of the home selling process, calculated as the number of days between the initial listing of a property and the closing of the sale. *Median* Time to Sale is the amount of time the "middle" property selling this month was on the market. That is, 50% of homes selling this month took *less* time to sell, and 50% of homes took *more* time to sell. Median Time to Sale gives a more accurate picture than Average Time to Sale, which can be skewed upward by small numbers of properties taking an abnormally long time to sell.

Month	Median Time to Sale	Percent Change Year-over-Year
April 2016	90 Days	8.4%
March 2016	83 Days	-5.7%
February 2016	74 Days	-29.5%
January 2016	95 Days	-9.5%
December 2015	91 Days	13.8%
November 2015	78 Days	0.0%
October 2015	74 Days	-10.8%
September 2015	105 Days	5.0%
August 2015	86 Days	-29.5%
July 2015	128 Days	33.3%
June 2015	100 Days	-6.5%
May 2015	110 Days	-0.9%
April 2015	83 Days	-22.4%

# Monthly Market Detail - April 2016

## Townhouses and Condos

### Charlotte County

## New Pending Sales

The number of listed properties that went under contract during the month

**Economists' note:** Because of the typical length of time it takes for a sale to close, economists consider Pending Sales to be a decent indicator of potential future Closed Sales. It is important to bear in mind, however, that not all Pending Sales will be closed successfully. So, the effectiveness of Pending Sales as a future indicator of Closed Sales is susceptible to changes in market conditions such as the availability of financing for homebuyers and the inventory of distressed properties for sale.

Month	New Pending Sales	Percent Change Year-over-Year
<b>April 2016</b>	<b>112</b>	<b>8.7%</b>
March 2016	106	-17.2%
February 2016	116	-14.1%
January 2016	86	-23.2%
December 2015	59	-4.8%
November 2015	78	14.7%
October 2015	65	-17.7%
September 2015	70	12.9%
August 2015	95	26.7%
July 2015	67	-28.0%
June 2015	58	-18.3%
May 2015	75	-13.8%
April 2015	103	1.0%

## New Listings

The number of properties put onto the market during the month

**Economists' note:** New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

Month	New Listings	Percent Change Year-over-Year
<b>April 2016</b>	<b>133</b>	<b>37.1%</b>
March 2016	138	9.5%
February 2016	157	23.6%
January 2016	172	0.0%
December 2015	114	23.9%
November 2015	113	13.0%
October 2015	106	-7.8%
September 2015	87	2.4%
August 2015	95	8.0%
July 2015	87	4.8%
June 2015	77	-4.9%
May 2015	67	-21.2%
April 2015	97	-42.6%

# Monthly Market Detail - April 2016

## Townhouses and Condos

### Charlotte County

## Inventory (Active Listings)

The number of property listings active at the end of the month

**Economists' note:** There are a number of ways to define and calculate Inventory. Our method is to simply count the number of active listings on the last day of the month, and hold this number to compare with the same month the following year. Inventory rises when New Listings are outpacing the number of listings that go off-market (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going off-market.

Month	Inventory	Percent Change Year-over-Year
April 2016	512	8.5%
March 2016	540	3.8%
February 2016	539	-0.7%
January 2016	519	-10.1%
December 2015	450	-13.8%
November 2015	427	-16.9%
October 2015	407	-19.2%
September 2015	380	-21.2%
August 2015	385	-17.9%
July 2015	409	-14.8%
June 2015	426	-17.8%
May 2015	443	-17.8%
April 2015	472	-17.2%

## Months Supply of Inventory

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

**Economists' note:** MSI is a useful indicator of market conditions. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 months of inventory. Anything higher is traditionally a buyers' market, and anything lower is a sellers' market. There is no single accepted way of calculating MSI. A common method is to divide current Inventory by the most recent month's Closed Sales count, but this count is a usually poor predictor of future Closed Sales due to seasonal cycles. To eliminate seasonal effects, we use the 12-month average of monthly Closed Sales instead.

Month	Months Supply	Percent Change Year-over-Year
April 2016	5.7	11.8%
March 2016	5.9	1.7%
February 2016	5.8	-4.9%
January 2016	5.5	-17.9%
December 2015	4.8	-18.6%
November 2015	4.6	-23.3%
October 2015	4.4	-22.8%
September 2015	4.1	-25.5%
August 2015	4.3	-18.9%
July 2015	4.5	-16.7%
June 2015	4.6	-20.7%
May 2015	4.8	-20.0%
April 2015	5.1	-19.0%

## Closed Sales by Sale Price

The number of sales transactions which closed during the month

**Economists' note:** Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately represented by year-over-year changes (i.e. comparing a month's sales to the amount of sales in the same month in the previous year), rather than changes from one month to the next.

Sale Price	Closed Sales	Percent Change Year-over-Year
Less than \$50,000	8	0.0%
\$50,000 - \$99,999	27	-30.8%
\$100,000 - \$149,999	24	-22.6%
\$150,000 - \$199,999	25	-10.7%
\$200,000 - \$249,999	20	-13.0%
\$250,000 - \$299,999	10	150.0%
\$300,000 - \$399,999	9	-18.2%
\$400,000 - \$599,999	11	120.0%
\$600,000 - \$999,999	2	-60.0%
\$1,000,000 or more	0	-100.0%

## Median Time to Contract by Sale Price

The median number of days between the listing date and contract date for all Closed Sales during the month

**Economists' note:** Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the month. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

Sale Price	Median Time to Contract	Percent Change Year-over-Year
Less than \$50,000	51 Days	112.5%
\$50,000 - \$99,999	22 Days	-8.3%
\$100,000 - \$149,999	37 Days	12.1%
\$150,000 - \$199,999	33 Days	0.0%
\$200,000 - \$249,999	62 Days	-35.4%
\$250,000 - \$299,999	34 Days	-70.7%
\$300,000 - \$399,999	259 Days	7.0%
\$400,000 - \$599,999	101 Days	-60.4%
\$600,000 - \$999,999	1026 Days	108.1%
\$1,000,000 or more	(No Sales)	N/A

## New Listings by Initial Listing Price

The number of properties put onto the market during the month

**Economists' note:** New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

Initial Listing Price	New Listings	Percent Change Year-over-Year
Less than \$50,000	5	-28.6%
\$50,000 - \$99,999	25	56.3%
\$100,000 - \$149,999	30	42.9%
\$150,000 - \$199,999	24	26.3%
\$200,000 - \$249,999	16	45.5%
\$250,000 - \$299,999	12	33.3%
\$300,000 - \$399,999	8	14.3%
\$400,000 - \$599,999	11	57.1%
\$600,000 - \$999,999	1	N/A
\$1,000,000 or more	1	N/A

## Inventory by Current Listing Price

The number of property listings active at the end of the month

**Economists' note:** There are a number of ways to define and calculate Inventory. Our method is to simply count the number of active listings on the last day of the month, and hold this number to compare with the same month the following year. Inventory rises when New Listings are outpacing the number of listings that go off-market (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going off-market.

Current Listing Price	Inventory	Percent Change Year-over-Year
Less than \$50,000	15	-11.8%
\$50,000 - \$99,999	80	5.3%
\$100,000 - \$149,999	78	20.0%
\$150,000 - \$199,999	67	31.4%
\$200,000 - \$249,999	66	15.8%
\$250,000 - \$299,999	62	1.6%
\$300,000 - \$399,999	65	3.2%
\$400,000 - \$599,999	56	-3.4%
\$600,000 - \$999,999	19	18.8%
\$1,000,000 or more	4	-50.0%
