Includes discussion, appetizers, espresso

REGISTER and more info at <http://www.nwabr.org/communityconversation>

### **What are Community Conversations?**

Each Conversation explores a topic in biomedical science, its role in society and connects people to the biomedical research community. Organic learning transforms participant knowledge and views, equipping us to promote awareness and advance participation in biomedical research. Add your voice to an engaging and intimate discussion with other curious and open-minded individuals. All are welcome. No science background necessary.
