

Empowering Churches with Web Capabilities

Union Presbyterian Seminary is offering churches in WV Presbytery the opportunity to join the WWW (world wide web) with webpage(s), email, calendars and more.

Ryan Abrahamsen, Webmaster for Union Presbyterian Seminary, will conduct a day long course on building and maintaining your church website using WordPress and setup and maintenance of email accounts. The training class will be held at the WV Presbytery office on Saturday, July 26 - 9:00 AM to 4:30PM. Lunch is on your own. Cost of the event: FREE (except lunch and travel). Reservations are required. Please call the presbytery office at 304-744-7634. In addition to the work you are doing in your own church, those attending this course are asked to be sources of occasional support in the presbytery for other churches.

Select from any of the FREE WordPress templates that the seminary offers or buy your own template and start building your website.

Union Presbyterian Seminary will host your website, in your own domain name, on their servers (\$10 month). This hosting includes:

- Your website that has your own domain name.
- Your domain named eMail account with unlimited addresses
- Your calendar and notepad.

YOUR PART (In this sequence or order)

- On July 26: Send people to training who will build and support your church website and email accounts. The cost of the training is FREE.
- At the training, select the template you want for your church site. If you use one of Union's, the template is FREE.
- Create and license your church's domain name, for example: www.mychurch.org. Estimated ANNUAL cost of maintaining domain name license: \$9.00.
- Build your webpages and create your email accounts. Upload your content to the servers of Union Presbyterian Seminary. Hosting cost: \$10 a month.
- As other churches in our presbytery come online, be willing to take a call or two to assist them with their questions.
