

Electrical Contractors Association of Saskatchewan

ECAS

ELECTRICAL SAFETY TRAINING SYSTEM ESTS eLearning

The ECAS has partnered with Terry Becker, P.Eng., CEMCP, IEEE Senior Member of ESPS Electrical Safety Program Solutions INC. in order to bring this training to ECAS Member Companies.

Effective stand-alone training solution for your entire workforce.

Training for workers across large geographic areas and remote locations.

ESTS eLearning is available anytime, anywhere.

The combination of multimedia, rich 2D and 3D graphics and virtual simulations provides an effective learning experience that is repeatable.

Increase productivity and control the impact on production by training workers during down times.

eLearning Courses

Electrical Worker Training

The Electrical Worker course content was developed referencing industry accepted best practice standards in support of meeting due diligence for arc flash and shock hazards. Training content is comprehensive and detailed, using interactive elements to help the student learn the concepts in how to apply the training in the field. A 3D Virtual Electrical Workplace is used to illustrate the concepts.

ESTS EW CAN: based on CSA Z462

\$125.00; quantity discounts as low as \$60.00/course

Non-Electrical Worker Training

Electrical Safety Training System (ESTS) for Non-Electrical Workers course focuses on workplace electrical safety and the methods used to recognize, identify and avoid the electrical hazards of arc flash and shock. Normal and abnormal equipment conditions are described and the human sense indicators of "Look, Listen and Smell" are used to identify potential abnormal conditions.

ESTS N-EW: \$45.00; quantity discounts as low as \$25.00/course
