

A Great Light
Lyrics and Music: Amir Dadon

If I was a bit sad
I might have learned something important
And when it's over
Everything has a reason

Alone in this madness
I think how time flies
And when it's over
Everything has a reason

A great light illuminates it all
And there's no more reason to question
I learn from what's good and from life
To start from the beginning
Like taking your first breath
I am here I am not "wasted" any longer

And if I could only remember
Each one has a journey to take
And when it's over
Everything has an answer

A great light illuminates...
