

KRAZOT MESAPROT כרזות מספרות

The Israel Education Initiative of the San Francisco Bay Area has created an educational program and wants to make this program available to you!

The historical and contemporary posters designed for Israel's Independence Day throughout the years serve as the backdrop for this educational material. These posters offer a rare perspective into Israel's national mood and aspirations as well as its historic and esthetic timeline. They reflect on the struggles, values and ideals of Israeli society and the social and technological changes that have taken place throughout the years.

Appropriate for learners of all ages, this material, which is rich in both content and creativity, can be approached in many ways. It can be sorted by themes, motifs and symbols, by values presented in the Declaration of Independence, by artistic techniques, by specific artists, and by decades, to name a few.

The educational component includes 2 booklets and a CD.

Vavi Toran, who developed and wrote this material, is available to come to your community, conduct educators' workshops and give lectures on the subject. Contact: vavitoran@gmail.com

We are making this educational kit and images for creating an exhibit available to your community.
