

ABA for Teachers & Other Professionals

Families Helping Families and Butterfly Effects will host a workshop specifically designed for teachers and other professionals such as Occupational Therapists, Physical Therapists, and Speech Language Pathologists.

During the workshop participants will learn about the principles of ABA and how to implement these interventions in their classrooms and their sessions. ABA is derived from the basic principles of behavior outlined by psychologist B.F. Skinner. Thousands of journal articles and books have demonstrated that ABA can be used to solve some of the most difficult behavioral problems.
