Tired of project managers who do not have a clear handle on how their projects are performing financially? Many contractors struggle with how to build a robust cost projection process that provides for consistency and predictability and banks and bonding companies are demanding contractors develop and implement robust cost controls.

Following this course, participants will be able to:

- Identify how to manage work-in-process for better profitability
- Explain the relationship between project profitability and processes
- Describe how to apply earned value reporting to projects

Key Performance Indicators - The Keys to Project Financial Management

Effective financial management expertise at the top of your operation is expected. However, it is common knowledge that effective financial management at the project management level is critical to your firm’s financial success. Learn how to identify the key indicators that monitor project performance and allow you to drive responsibility to the project level, affecting the greatest positive change. Discover how to automate processes throughout different levels of your organization so that the correct information is reaching the right staff levels in a timely manner.

Following this course, participants will be able to:

- Describe key performance metrics that create actionable information
- Discuss data collection and metric automation methods
- Explain deployment options
