

INTRODUCTION TO CELL PHONE INVESTIGATIONS

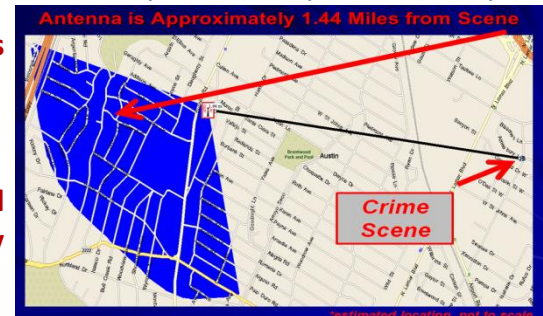

Tuesday, October 13th, 2015 / 9 AM – 5 PM

Franklin, MA (Boston Area)

Training includes the following and more:

- What data is available from cell phone companies, including records of phone calls, geographic data, text messages, multimedia messages, voicemails, and Internet data such as emails, web traffic, and IP data?,
- What data is available on the physical cell phone devices themselves and important considerations for all first responders?,
- Introduction to how law enforcement typically uses the data,
- Introduction on how to interpret, analyze, map, surveil, archive, and present this extremely valuable data that is present in essentially **EVERY** criminal investigation conducted,
- What real-time surveillances may be conducted on cellular telephones, including traps and traces, pen registers, geolocations, and intercepts known as “wiretaps?”,
- Introduction to important considerations regarding the courtroom presentations of cell phone data, and,
- Introduction to important legal considerations regarding accessing and utilizing cell phone data, and, where the field is headed and how will it impact law enforcement.

Registration link: <http://tinyurl.com/GeocellNESPIN1Day2015>

Or, submit the form on the following page:

Geocell, LLC has been providing training extensively since 2009 and all instructors are thoroughly experienced and trained practitioners in the field.

Geocell has provided over 1,000 hours of formal training to over 6,000 attendees from hundreds of agencies in over 115 formal training events nationwide.

Geocell has also been hired to provide training for the FBI and many other state and local agencies. Extensive references are available upon request.

INTRODUCTION TO CELL PHONE INVESTIGATIONS

Day 1

Introduction: what is the data and where is it held?

How is the data typically used to support investigations?

Introduction to important legal considerations

Introduction to very important physical forensics considerations

Making the data "intelligent" and what tools are available?

Introduction to surveillance possibilities regarding cell phones

Intro to courtroom presentations

All attendees will be provided a thorough full-color course guidebook.

All attendees will be provided a pen and notepad.

Additional Geocell course are being offered the same week at the same location. See below for details!

All students who successfully complete the course will also receive a certificate of training.

For those interested, an advanced three day advanced interpretation and mapping hands-on course will be presented immediately following this course, on Wednesday through Friday, 10/14 - 10/16/15, at the same location. The hands-on course uses a mobile computer lab and a description of the advanced course may be found at www.geocell.us/advanced.html. Registrations may occur [here](#).
