

**INTERPRETATION &
MAPPING OF RECORDS**

Wednesday - Friday, April 6th – April 8th, 2016 / 9 AM – 5 PM

Fort Worth, Texas

Approved for Texas TCOLE Training Credit!

Training includes the following and more:

- This course is an advanced course that skips the vast majority of background information typically provided in basic courses and jumps right into the specific interpretation and mapping of geographic data available from cell phones. *A one day introduction course will also be presented at the same facility the day prior to this advanced course if potential attendees wish to get a good introduction to the field prior to this course.*
- This is an intensive hands-on course where all students will be provided with a computer (*for use in the course*) and test data in order to perform thorough practice with the actual interpretation and mapping of the eight largest cell phone companies' records.
- Students will get specific instruction on the data available from the eight major cell phone companies, the various companies' retention periods and available data, *and*, perform hands-on exercises with test data from each of these major companies.
- Instruction will also cover methods for producing intelligence reports and even courtroom presentations with mapped data, *and*, will provide information on the available tools to map this valuable data.
- Extremely important roaming considerations will also be discussed along with other important information.
- *Students will perform extensive exercises in this course and should have a thorough understanding of how to interpret and map these companies' records after successfully completing this advanced course!*
